Project: Development of a job-placement and recruitment web-platform for National Employment Agency

Position under the project: QA Engineer/Tester

Implementation period: March 2020 – December 2021

Project description:

A job portal platform where candidates look for jobs and employers post their jobs. The purpose of the development was primarily the unification of two employment portals belonging to our client, in a unique platform, by connecting employers and job seekers on a single platform. Merging these two platforms was the key challenge to be faced by our team. The platform had to be focused on usability, maximum commitment and top customization.

Main technologies: ASP .NET, PostgreSQL, Redis Cache, Prometheus, Grafana, Logstash, Elastic Search, ViewJs, CSS.

Project: Design and production of an eLearning platform for Tekwill in Every School initiative

Position under the project: QA Engineer/Tester

Implementation period: July 2020 – present

Project description:

Tekwill in Every School initiative is aiming to provide all schools in Moldova the opportunity to access a free eLearning platform and benefit from an innovative online curriculum, as well as, stay connected to all Tekwill's educational resources and opportunities.

This project involves the customization (design and development services) of an open-source Learning Management System (LMS) platform for Tekwill in Every School initiative.

Main technologies: Drupal 8; Opigno LMS; PHP; MySQL; HTML; JavaScript; CSS; Drush.

Project: Workflow Management Platform & E-Learning for Institute of Financial Studies (ISF)

Position held within the project: Junior QA Engineer/Tester

Project Description:

The Workflow Management Platform is an IT solution that ensures efficiency and modernization of the activities carried out within the institution. The "Workflow Management Platform" aims to create a virtual environment to streamline all the ISF processes of, such as: professional training management, examinations, profiles definition, registers management, online payment flows management, automatic generation of certificates or competences etc.

Implementation period: October 2018 – January 2020

Project: Information security management system ISO 27001

Position held within the project: Junior QA Engineer/Tester

Project Description:

Designing, development and implementation on a web platform of ISO DMS Application, that is intended to manage the Information Security Management System (SMSI) according to the standard ISO 27001:2013.

The application allows to: identify information security risks within an organization, the methods of dealing with those risks, identify the controls to reduce those risks, assigning responsibilities for the implementation of controls and methods, monitor (measure) how these controls are applied and how they operate, identify corrective actions to improve the aspects that need to be improved.

Implementation period: May 2019 – December 2020

Project: Center for Policies and Reforms (CPR)

Position held within the project: Junior QA Engineer

Project Description:

The Center for Policies and Reforms is an independent platform, which aims to improve public policies in the Republic of Moldova and promote structural reforms in line with European principles, for the benefit of society.

Implementation period: October 2019 - December 2019
