CERTIFICATES

The main environmental standards in brief:

	The PEFC (PEFC/06-37-03) label, introduced by the Program for Endorsement of Forest Certification, verifies that the wood based raw-materials of products originate from forests certified according to one of the certification systems by PEFC (PEFC/06-37-03) or meet the criteria of the PEFC (PEFC/06-37-03) Chain-Of-Custody standard. For more information about PEFC, please click on the following link: https://www.pefc.org/PEFC - Europapier Certificate
	The FSC® (FSC C017326) label, introduced by the Forest Stewardship Council®, provides assurance, that the wood based raw-materials of products originate from responsible forest management according to the FSC® (FSC C017326) standard or meet the criteria of the FSC® (FSC C017326) Chain-Of-Custody standard. For more information about FSC®, please click on the following link: https://ic.fsc.org/en
	Nordic Swan The Nordic Swan for paper products is a comprehensive Ecolabel applicable to both fresh and recycled fibre products and defines criteria regarding emissions, energy consumption, origin of raw materials and specific chemicals.
	Carbon Neutral Product The term "Carbon Neutral" determines that the greenhouse gas emissions associated with the production of a product are «offset» through credits that fund renewable, emission-free energy projects such as wind farms, solar installations or energy efficiency improvements.
	Blue Angel The Blue Angel for paper products is a comprehensive Ecolabel applicable to products, which are exclusively or largely based on recycled fibre, and defines criteria regarding the quality grades of the utilized recovered paper and chemicals.
	Certified Green Energy (Green-e) The Green-e label is a recognized symbol to help consumers identify superior, certified renewable energy products. It verifies that the Renewable Energy Certificates (RECs) meet strict environmental and consumer protection standards.
