

- Front loaded
- 9 body capacity
- 304 grade stainless steel inner and outer surface
- 9 compressor to cool each cell independently
- Digital control unit that enables to control temperature of each cell separately
- The refrigerator construction material: sandwich panels made of polyurethane injected with 42kg/m3 density
- Both sides with sheets of metal with polymeric coating min. 0.5 mm
- Power supply: 220 V / 50 Hz
- Temperature indicator - digitally
- Refrigerating agent – R 404 A
- Temperature control – programmable
- Doors: isolated door for each corpse; hermetic lock
- Equipped with 9 stretchers Stretcher construction: slipper on wheels with handle; all construction of stainless steel; surface 2000 x 600 mm
- Lockable swivel castors
