

Product: Protective Glasses with Side and Front Protection

Lot: 11

Quantity: 250 pcs

Size: Universal

Weight: 81 grams

Packaging: Individually sterilized and packaged for optimal hygiene

Description:

High-performance, colourless protective glasses designed to provide full eye safety with sealed **side and front protection**. These glasses are manufactured from **polycarbonate or equivalent material**, free from metal components, and include a **flat visor** with a **soft plastic frame** for added comfort.

Their **panoramic, one-piece frame** ensures wide-angle vision and a tight fit around the face using a specially designed elastic band. The transparent side panels do not obstruct peripheral vision. Indirect ventilation improves comfort during extended use.

Key Features:

- **Panoramic, sealed frame** offers enhanced chemical, thermal, and mechanical protection
- **Can be worn over prescription glasses** without compromising fit or protection
- **Compatible with half-face respirator masks**, ideal for high-protection environments
- **Autoclavable:** Can be sterilized in autoclave devices with pressurized steam at 121°C for 15–20 minutes
- **Anti-Fog & Scratch-Resistant Options:** The lenses can be optionally treated with anti-fog and scratch-resistant coating
- **Elastic structure** ensures a secure and comfortable fit on all head shapes
- **Sterilized packaging** maintains hygiene standards for medical or laboratory use
