

**RESIDENTIAL  
AIR CONDITIONING  
2020-2021**

With Sinclair air-conditioners, you can easily enjoy homely comfort and pleasant atmosphere in all types of residential living. Sinclair offers wide range of capacities, types and designs. Even for complex projects, we can find easy and comfortable solutions - e.g. MULTI VARIABLE SERIES with energy-saving technology DC INVERTER.

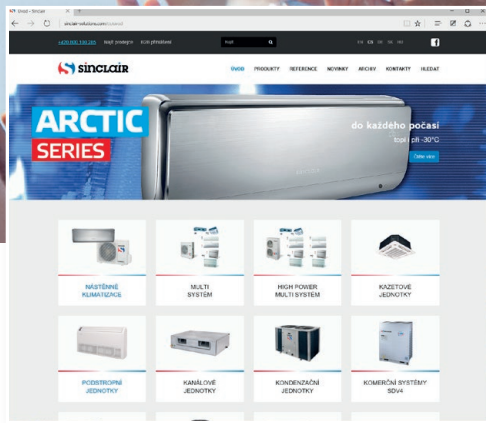

From the very beginning Sinclair has set its main target to bring quality and comfort to the life of people of the Blue Planet. Thanks to the attention paid to research, development, manufacturing and product testing as well as to the after sales support, Sinclair has reached a high level of quality and reliability.

Sinclair products are in conformity with European standards, which guarantee safe operation.

## PLASMA+TEC

Switch on the great new feature of your Sinclair air conditioner – PLASMA technology and feel the air becoming cleaner and fresher.

Sinclair air conditioner will not only cool or heat your room, but it will also make your environment safer. Plasma technology will make the air cleaner, fresher, free of harmful bacteria. Protect your family with this new feature. Lower your chances of becoming sick with flu or any other illness caused by air-borne bacteria. You can lower the allergens in the air, improving life of allergic persons.

Plasma air technology produces a natural bio-climate rich in active oxygen molecules, known as ions. The Plasma air system creates a measurable and controllable quantity of positive and negative oxygen ions. The negative ions contain an extra electron while the positive ions are missing an electron resulting in an unstable condition.

### **These unstable ions provide the following benefits:**

#### PARTICLE REDUCTION

Air-borne particles are charged by the ions through ionic bonding. These charged particles stick together and becoming heavier then fall to the floor. These larger particles are also returned through the air conditioning system where they are captured by the filter.

#### ODOR NEUTRALIZATION

Odorous gases and aerosols oxidize on contact with active oxygen molecules. odors, especially of an organic origin, are quickly eliminated.

#### VOC CONTROL

Volatile organic compounds (Vocs) are emitted as gases where there is carpeting, building materials, furniture, office equipment, cleaning agents, paints, glues, solvents or pesticides. The ions trade electrons with these Vocs breaking down their molecular structures into less harmful ones.

#### HEALTH BENEFITS

Human and animal lungs absorb oxygen more efficiently from clean ionized air, enhancing general health and well-being. alertness and concentration is improved.

## DC INVERTER

Standard air conditioners have a fixed speed compressor and therefore have no ability to reduce the power consumption as they are not able to vary the load. With a DC Inverter Drive, the unit can work on a partial load thereby reduces the power consumption not only on start up but also on running costs.

With the DC Inverter technology the temperature does not fluctuate and therefore provides more comfort. Energy consumption can be reduced by as much as 44% compared to fixed speed compressors.

## OPTIONAL FILTERS

These optional filters can be used only with wall mounted split units and console units. For availability, please, contact manufacturer.

### LTC CATALYST FILTER

A mechanical filter intercepts aerosols and particles, purifies indoor air under room temperature and condition, catalyzes and decomposes up to 80% ammonia, hydrogen sulphide and aldehyde. This filter is constant and can be used for long time without regeneration. It is water washable and the effect is the same after wash. Accessories for all wall mounted types of air conditioning.

### CATECHIN FILTER SAF-OPWC

Catechin is a green tea extract, which is being added to the filters for its oxidizing and sterilizing effects. Active enzymes form a benzene nucleus which absorbs odors and harmful substances in the air. Catechins filter effectively captures and sterilizes dust particles. It is antibacterial and destroys more than 95% of bacteria, e.g., Staphylococcus aureus.

### ACTIVE CARBON FILTER SAF-OPWA

Activated carbon is an excellent absorbent with capability of dual absorption: physical and chemical, as from air and from fluids. Quickly absorbs harmful gases, e.g., benzene, formaldehyde and ammonia.

### PHOTOCATALYTIC FILTER SAF-OPWP

Photocatalytic filter reduces odors and germs via its ultraviolet light. Effectively purifies the air and keeps it fresh. Titan TiO<sub>2</sub> contained in this filter has a strong photocatalytic effect, but it is also environmentally friendly. Removes from the air more than 90% of acetic acid, formaldehyde, ammonia and more than 70% of renewable pollutants.

### SILVER ION FILTER SAF-OPWS

Silver ion filter is an entirely new kind of powerful sterilizing product. Silver ions are odorless and colorless and have no side effects, such as irritation, pollution or volatility. After sterilization the ions recycle themselves, therefore have a long lifespan and effectively prevent bacterial growth. The filter is also environmentally friendly and completely safe. It is highly efficient and destroys over 99% of the bacteria. Silver ions themselves attract bacteria and microorganisms, pass through the cell membrane and inhibit the cleavage activity of the bacteria. Disrupts DNA structure of bacteria and microorganisms, causing a loss of reproductive ability of bacteria.

### BIOLOGICAL ANTI-BACTERIA FILTER SAF-OPWB

This filter is made of a material with excellent capabilities of sterilizing and capture of dust. When air flows through the filter, dust and bacteria are retained on the filter surface, which is bio-bactericidal. In case of attachment of microbes, bio-bactericidal surface disrupts its metabolism and limits its growth. Efficiency of capturing of Escherichia coli and Staphylococcus aureus is higher than 95%.

### ANTI MITE FILTER SAF-OPWM

This type of filter helps you to remove almost 90% of mites quickly. Anti Mite filter appreciate especially people with allergies and asthma.

### COLD CATALYST FILTER SAF-OPWK

Material of this filter is PU polyurethane, multiple catalyst fiber. Effectively catch and remove formaldehyde and other volatile organic compounds (VOCs) as well as harmful gases and odors. Cold catalyst filter can reach a 92.9% formaldehyde removal ratio within 2.5 hours.

## OTHER ADVANTAGES OF SINCLAIR AIR CONDITIONERS

### I FEEL

The mini sensor in the remote controller can sense its surrounding temperature, and transmit the signal back to the indoor unit. So the unit can adjust the air flow volume and temperature accordingly, to provide maximum comfort and save energy simultaneously.

### LOW AMBIENT TEMPERATURE FUNCTION

#### -18 °C COOLING

Cooling at -18 °C while keeping a reliable operation. As the outdoor temperature changes, the frequency of compressor and the speed of fan adjusts accordingly.

#### -30 °C HEATING

Operates finely when heating at -30 °C. It is supported by SINCLAIR electrical heating chassis, preheating technology and frequency-adjusting compressor.

#### 8 °C HEATING

Maintains the room temperature steadily at 8 °C and prevents the room from freezing by heating operation when nobody is at home for long time.

### COLD AIR PREVENTION

The copper pipe will be heated in advance, so the air will not be flowed out before it reaches the set temperature.

### COMFORTABLE SLEEP MODE

**MODE 1:** Indoor temperature automatically rises (when cooling) or drops (when heating).

**MODE 2:** Featuring unique refreshment function, the temperature is automatically adjusted to be a little lower before you wake up.

**MODE 3:** You may design your own sleep curve under DIY mode.

# COMMUNICATION MODULE

## SCMI-01.4

- **Low evaporating temperature up to -10 °C**
- 3 basic operation modes \*
- Control of separate condensing units of UNI SPLIT series
- Direct operation mode (cooling) or reverse operation mode (heating)
- Control of FMD modules
- Password protected setting
- Language options (English, German, Polish, Hungarian, Croatian, Czech)
- Pre-setting of all parameters via USB Communicator software
- DIN rail compatible – 4M wide, installation in power distribution unit
- Available also in SCMI-01.4X, which extends the goal temperature range from -30 °C to +55 °C

COMMUNICATION MODULE			
Power supply	-		230V/50Hz ±10%
Rated power input	VA		15
Dimension (wxhxd)	mm		90x71x58
Package dimension (wxhxd)	mm		120x100x80
Net/gross weight	kg		0,21 / 0,35
Storage temperature	°C		-25 ~ +70
Operating range	°C		-10 ~ +55
Outputs			3x output relays 230V/2A
Inputs			communication input
			2x input for temperature sensors; input for FMD modules (VE+, VE-)
			1x voltage input 0-10V, resistance 100kΩ
			1x current input 4-20mA for pressure sensor 0-18bar
Standard accessories			2x temperature sensor NTC015WF00 (10kΩ; B=3435)
Optional accessories			Pressure sensor Alco Controls PT5-18M

### \* 3 BASIC OPERATION MODES

Autonomous temperature control mode. The system changes its performance in order to achieve set temperature measured with T2 sensor. You can set temperature from -10 °C to +55 °C

Slave unit mode – operated: You set the compressor performance directly via 0-10V input. Evaporating temperature depends on compressor performance and other conditions

Autonomous pressure (evaporating temperature) control mode for cooling only: The compressor performance changes based on evaporating pressure. You can set the pressure which corresponds with temperatures from -10 °C to +55 °C

# OPTIONAL ACCESSORIES

## WIRED CONTROLLERS SWC-02 AND SWC-03

SWC-02 for MULTI VARIABLE, R32 wall mounted and console series. SWC-03 for indoor units of UNI SPLIT series. This optional wired controller with touch screen is connected directly to the indoor unit.

- Selection of basic modes
- Address setting for central control
- Displaying unit status
- Displaying error codes
- Real time on display
- Sleep, health, quiet operation functions
- Holiday mode (tempering)
- Save / Turbo / (X-fan)
- Blocking of selected functions
- Child safety lock of buttons
- Auto restart
- Timers (daily, weekly, two-week)

## WIFI MODULE SWM-03

- WIFI module can be connected to indoor unit to achieve long distance control with smart phone or tablet
- SWM-03 is optional accessory for UNI SPLIT units.

## MODBUS GATEWAY SMG-01

Enables the communication of indoor units of UNI SPLIT series via the Modbus protocol.

- Can be used for connection of external control system, which uses Modbus protocol or for connection of central controller SCC-36 or SCC-16 respectively
- Control software is not included, it has to be field supplied

## SCC-16 CENTRAL CONTROLLER AND WEEKLY TIMER

Can be used with UNI SPLIT series, Multi Variable series and wall mounted units equipped with wired controller

- Weekly timer (minimum runtime 0.5h)
- Connection via wired controller
- It is necessary to order a sufficient number of SCC-16K cables to SCC-16 central controller
- Connects up to 16 indoor units

## SCC-36 CENTRAL CONTROLLER AND WEEKLY TIMER

Can be used with UNI SPLIT series, Multi Variable series and wall mounted units equipped with wired controller.

- Stylish central controller with touch screen
- Connects up to 36 indoor units
- User friendly interface
- Weekly timer
- Single, group or all units control

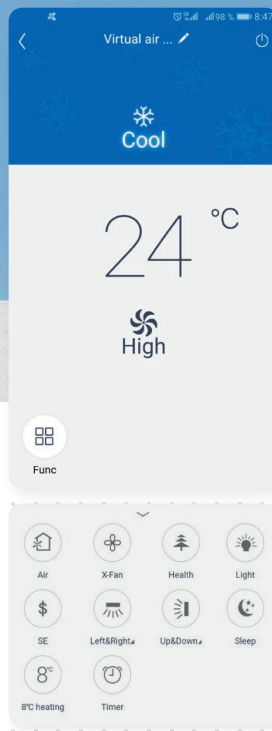

### NEW

## SAI-01 ALARM INTERFACE

The SAI-01 is an external, separately powered module, which can be connected to the communication line of wall-mounted air conditioner to indicate the operational or malfunction status of the air conditioner.

# OPTIONAL ACCESSORIES

## WIFI EWPE APPLICATION

The indoor unit has inbuilt WiFi module, with which the air conditioner can be controlled by iOS or android phone / tablet.

Use Google Play or App Store to download EWPE app.

## G2S GSM MODULE

G2S module is used to control Sinclair air conditioners via your mobile phone. It uses IR for communication, so it is not necessary to connect it to the air conditioner. It acts like a second remote control. The module is equipped with two transmitting IR diodes, signalling diode, SIM card slot and also with power supply and USB port connectors.

**NEW**

## G2S-T MODULE

It is designed for external monitoring of two temperatures. In case of cooling or freezing goods and food or if technologies (eg. servers) are air-conditioned, it minimizes the risk of failure by sending a SMS or by phone ring to a pre-selected phone number.

## SDT-ASH DIAGNOSTIC TOOL FOR WALL MOUNTED UNITS ASH-XXBIX

INDOOR AND OUTDOOR UNIT DIAGNOSTIC

- Running parameters
- Simulation run of indoor or outdoor unit
- Test of indoor and outdoor mainboard during communication malfunction
- IR receiver (can be used during outdoor unit's test run)
- User friendly (just 4 buttons)
- Simple display (4 lines)
- No need for other accessories
- Connected to terminal board of units

## SDT-MV DIAGNOSTIC TOOL FOR MULTI SPLIT AIR CONDITIONING

COMPATIBLE WITH MULTI VARIABLE, MULTI SYSTEM  
AND HIGH POWER MULTI SYSTEM SERIES

- Automatic detection of connected units
- User friendly interface
- Running parameters of whole system
- Connected to outdoor unit's mainboard
- 3 diodes (power supply, running, error)
- Power supply: USB connector (5V adapter is field supplied)
