

TO WHOM IT MAY CONCERN

The Finnish Border Guard (FBG), hereby attest that Vision Box - Soluções de Visão por Computador, S.A. (Vision-Box), was awarded the project "Supply & Delivery of 500 Facial Cameras, their software and initial installation services" (Contract # RVLDno 2021-392).

Vision-Box executed this project and delivered what was contracted reaching final acceptance, enabling the support & maintenance phase of the contract.

The purpose of the procurement was to acquire biometric facial cameras to be used at the primary manual border check booths nationwide (air, land, sea, rail) to capture full frontal images for the purposes of European Entry-Exit System (EES) enrolment and verification in accordance with the requirements set in the Commission Implementing Decision (EU) 2019/329 (25.02.2019) and its reference standards and requirements set in its Annex. As regards the facial images to be captured, the relevant references are ISO/IEC 19794-5, ISO/IEC 39794-5 and in particular, ICAO TR on Portrait Quality (version 1.0, April 2018).

Vision-Box has supplied 500 units of its Seamless Desk Lite product (hardware and software) including a Business API embedding the device manager, the SDK to interface with the Finnish Border Guard Border Management System, and its VisiontecFR Facial Recognition engine to capture compliant faces. It also encompasses a user facing software interface to command the solution under officer's control, in order to achieve the capture of a compliant facial image when interacting with a third-country national during border check procedure.

In the scope of this project, Vision-Box was responsible for Project Management, design of software and hardware, development, and production (manufacturing, integration, and coordination with external systems), shipping of equipment, on-site deployment for 5 initial units, commissioning, and quality assurance of the entire solution for collection, transmission, storage, processing, analysis and management of data, including video images and video information and processing of biometric data.

Vision-Box is also responsible for Support & Maintenance Level 3 and extended warranty for the term of the contract (5 years) from its signature.

The Total project value is > 1.500.000,00 EUR (above one and a half million euros), excl. VAT.

We hereby certify to the best of our knowledge, Vision-Box has been satisfactorily supplying the goods and services described. The Project, including Support and Maintenance, has a 5-year duration from start date,

- Project start: year 2021
- Project delivery and acceptance: year 2022
