## Double J Stent / DJ stent / JJ Stent / Ureteric stent / Ureteral Stent / Double Pigtail Ureteral Stent

Double J Stent

### Application :

Double J Stent is placed inside the ureter during surgery to ensure drainage of urine from the kidney into the bladder.

Double J stent is made from tecoflex polyurethane which is highly radio opaque and gives better visualization.

### Features :

Pigtail shape prevents stent migration.

Superior bio-compatibility.

Thin wall designed for maximum drainage.

Tapered at both the ends - for easy insertion.

Minimized tissue irritation with easy but rapid Traumatic insertion.

Can be used for long term indwelling.
