

ALDARMED
Medical Supplies Factory

**We are experts in
our business...**

Since 2018, Aldar Medical has been executing production, quality, R&D, sales and supply-chain activities at the total area of 9200 m², of which 7500m² is covered in Bursa, Turkey.

Aldar Medical produces Sterile Medical Syringes (Luer Slip/ Luer Lock) with the size of 2,3,5,10,20,50 ml and full range of Hypodermic Needles under strict clean-room manufacturing conditions according to current GMP, ISO 7886, ISO 7864, ISO 13485 and MDR.

Syringes and Hypodermic needles are manufactured and packed with the fully automatic production lines from injection molding, printing, assembly to blister packaging under 1100 m² clean-room (Class 100.000)

Fully Automatic Manufacturing Line

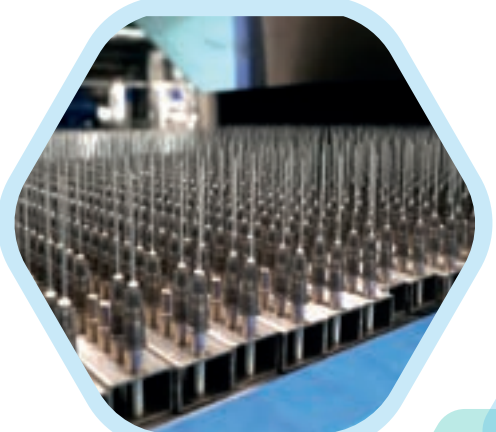

Products are sterilized with the fully validated EO Sterilization Chamber (25m³) and ventilated minimum 6 hours in special degassing rooms!

Aldar Medical meets and exceeds customer's expectations and needs by closely following the latest product developments and quality regulations in the medical devices industry while maintaining the continuity of customer satisfaction with the best quality and service!
