

## Snap Test Tube Rack

BOENMED manufactures SNAP TEST TUBE RACK.

Plastic test tube racks are shipped flat, easily and permanently snapped together to save shipping expense and reduce shelf space needed in storerooms.

These racks for tubes up to 21mm provide excellent stability with no tendency to float or move in circulating water baths.

Alphanumeric markings are molded into the racks to provide easy test tube identification.

Easy-to-assemble polypropylene racks snap together in seconds.

Suitable for autoclaving and use in water baths

Available in three colors for easy identification.

Color: white, red, blue

Cat No.	Description	Qty/Case
