

DailySnare.

More comfort and reliability in everyday hospital routine.

In order to make the removal of polyps in everyday hospital routine as efficient as possible, MICRO-TECH has developed a program of disposable polypectomy snares which perfectly combines quality with cost effectiveness. Each oval snare is made of spe-

cially stranded wire, which convinces by its good radial force, high dimensional stability and precise cutting properties. The 3-ring-handle gives you a secure hold and transmits every movement reliably to the snare.

Specific characteristics:

- very comfortable to use
- reliable and safe
- innovative HF-connection
- ergonomic 3-ring handle
- excellent cutting characteristics
- high strength of shape

Successful in practical use.

The special stranded wire of DailySnare endows the snare with the radial force it needs to open and be controlled in any position, easily and reliably. DailySnare has proved its worth as a reliable solution in daily routine work owing to its enormous dimensional stability and good cutting properties. Thanks to the new handle the snare can easily be opened and closed even if connected to the HF-cable.

Injection needle IN.

Reliable and safe to the tip.

The disposable MICRO-TECH injection needles facilitate clinical practice due to its ergonomic handle and especially sharp needle. The anti-skid design guaranties convenient control with just one hand.

For even more precise punctures the needle can be locked in several stages. When the needle is released, it snaps back into the catheter to avoid damage to the working channel.

Specific characteristics:

- ergonomic anti-slip handle
- adjustable pressure pad
- automatic needle-feed
- atraumatic distal metal head
- needle with extremely sharp, precision cut
- different needle diameters
- LL needle connector

Metal head with precise needle

Injection-needle Safety Needle SN.

Precision with a unique safety concept.

With the injection needles from bauer medical, punctions become safer and more precise than ever. On one hand, it is the newly developed handle with a particularly ergonomic shape which ensures more tactile feel and an audible locking. On the other hand, it is the special bevel-style grinding of the needle, allowing for highly precise punctions, even under difficult

conditions. Matching the specifications of the UVV for enhanced safety, this injection needle provides even more protection: Upon completion of the application the proximal handle can be kinked at a defined breaking point. The forced retention of the needle in the tip of the catheter helps to avoid injuries.

Specific characteristics:

- handle with tactile ergonomics
- needle with special bevel-style grinding
- distal protector head for needle tip
- CLICK noise when inserting and retracting the needle
- unique safety concept for non-injurious disposal
- needle diameter of 0.5 / 0.7 / 0.9 mm

Basket extractor.

Remove foreign objects safely and specifically.

The extraction baskets from bauer medical are not only suitable for stone extraction in the bile duct, but also for use in the upper and lower intestinal tract for the safe recovery and removal of foreign bodies such

as marbles or batteries. The rotation of the Vario basket ensures safe and reliable recovery of the foreign body.

Specific characteristics:

- fixed pre-determined breaking point
- smooth wire with optimized gliding quality
- ergonomic grip for improved tactile feeling
- stone extractor basket with atraumatic tip
- vario basket

Atraumatic tip gentle to working channel and mucosa

Highly mobile grip for precision insertion and extraction
