

Zhishan Model no .: 10217 respirator designed for the German market

- effective protection against microorganisms (bacteria, viruses, fungal spores ...), dust, solid and liquid particles;
- without exhalation valve;
- also suitable for casual wear instead of a veil;
- 4 layers for perfect respiratory protection;
- full effectiveness for 8 hours.

The FFP2 respiratory respirator filters at least 95% of microorganisms (bacteria, viruses, mold spores), dust and other impurities. The inner layer is made of a

fine material, thanks to which the respirator is comfortable even when worn for a long time. Together with the 8-hour efficiency, this makes it an ideal everyday protection. The respirator is attached with rubber bands, so you can handle it easily and quickly. It is also equipped with a nose clip for better sealing and shaping to the face.
