

Canon

Aplio go

Surprisingly small.
Incredibly smart.

Start simple. Go places.

Aplio go is small and agile. With its optional battery, it can be easily transported and placed anywhere. Its smart performance supports you in a wide variety of tasks with outstanding reliability, balanced workflow and unmatched image quality. The versatile system architecture allows you to grow with Aplio go should your diagnostic portfolio expand.

Get there faster

A suite of automated measurement and analysis tools, such as Auto EF for the left ventricle or automated IMT measurement, helps you increase the accuracy, consistency and speed of your exams.

Auto EF measurement

Automated IMT measurement

Crystal clear imaging.

Aplio go ensures that excellent image quality can be your benchmark at any time and thus enables quick and easy examinations with high reliability.

Next-generation transducer design

A new set of lightweight transducers with proven ergonomic design and outstanding usability allow you to work efficiently and comfortably.

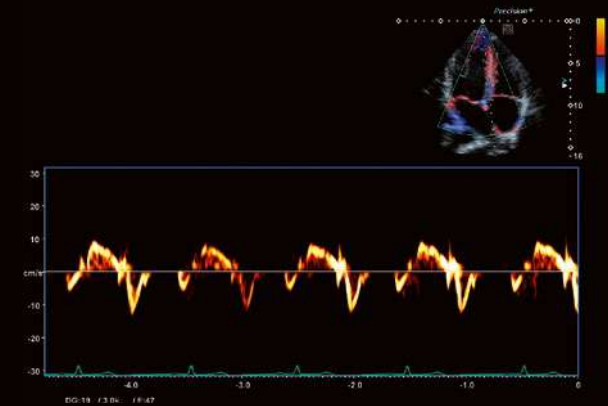

Lightweight design

Aplio go offers a wide range of image enhancement options from Canon's high-end portfolio to help you obtain high-quality images, even for difficult-to-scan patients.

For increased imaging consistency and ease of use, the system provides a Quick Scan option that allows you to automatically adjust the image quality with a simple keystroke.

Thanks to its versatile, multipurpose design and wide range of standard and specialized transducers, Aplio go offers consistently solid performance across the entire range of clinical applications.

Aplio go allows you to build a productive, fully integrated work environment in your office or in a mobile setting, so you can work efficiently with the system and share clinical results as needed.

Truly compact and efficient.

Great performance in a small package, robust imaging and a clever workflow – that's Aplio go. The system quickly connects you to your network and colleagues, just like it should.

Cloud services

The system's Tricefy* option gives you direct access to cloud-based communication, image management and documentation. With Tricefy, you can instantly share medical images and reports with referring doctors and patients.

*requires an additional third-party subscription and may not be available in all regions.

Remote connection

Need expert advice? Or want to share some findings with peers? With Canon's optional ApliGate solution you can interact securely – right from your workplace.

Aplio go connects seamlessly into hospital networks providing a full-spectrum solution that helps you manage patients and exams more efficiently, while embracing standardized data formats.

For smaller hospitals or practices without an extensive hospital network, Aplio go also offers the option of connecting to a local NAS in order to securely store and share all data.

Uncompromising

The system's context-sensitive user interface helps you ensure uncompromised imaging results in stationary and mobile use.

Flexible

Aplio go can be supplied with a range of panel heights for optimal positioning depending on your requirements.

Mobile

With its fully integrated battery option, Aplio go supports you in working remotely and cordless for up to 30 minutes.

Agile

Its small form factor, reduced weight and the large easy-roll casters make the system extremely maneuverable.

Activity is Canon Medical's new approach to AI innovation. It is a multimodality, overarching brand, which pulls together all the AI technology that Canon Medical provides under one name.
