

Oropharyngeal Airway / Guedel Airway 口咽通气道

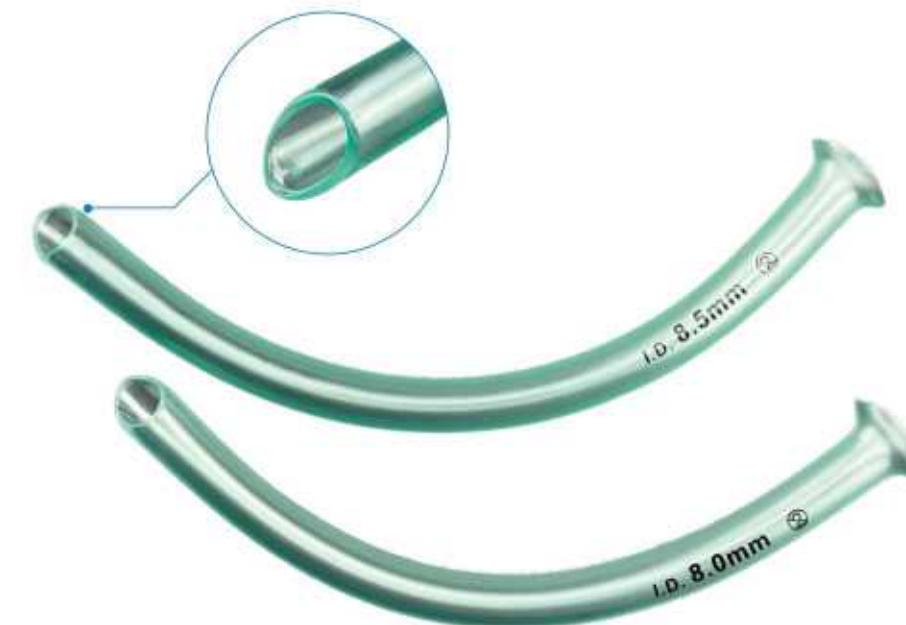

Guedel airway is a non-tracheal and non-invasive ventilation tube, which can prevent the tongue from falling back, open the airway quickly, and establish a temporary artificial airway. It is divided into various models according to the patient's age, weight, and anatomical changes. It has the characteristics of simple installation, easy control, good ventilation effect, and small damage.

OA50A	00	Blue	50
OA60A	0	Black	60
OA70A	1	White	70
OA80A	2	Green	80
OA90A	3	Yellow	90
OA100A	4	Red	100
OA110A	5	Light Blue	110
OA120A	6	Orange	120

Nasopharyngeal Airway 鼻咽通气道

Nasopharyngeal airway consists of a breathing tube with a flanged end. This product is suitable for establishing open airways for patients during surgery. The curvature of the tube body is designed based on the structure of the upper respiratory tract, with a special treatment for the head end, which is smooth and round, convenient for doctors to insert, and good patient compliance.
