## SOFTWARE AND PRINTER MANAGEMENT

### Tracking and reporting

**Universal Login Manager\* (ULM):** Manage your costs easily by using the embedded reporting capability to identify and control costs on a user-based level by device. uniFLOW Online Express: Combining with ULM you can gain further control and highlight expenditures per users/department and pinpoint where costs can be scaled down from a central cloud based location.  
\*Installation, activation & registration required

### Remote management tools

**iW Management Console:** Server-based software for centralised management of a fleet of devices (includes monitoring or consumables, status monitoring and alerts, distribution of address books, configuration settings, firmware and MEAP applications, meter capture and reporting, driver and resource management)  
**eMaintenance:** Compatible with eMaintenance services via embedded RDS (Enables meter capture, automatic consumables management, remote diagnostics and reporting for service providers to offer efficient, fast and proactive maintenance)  
**Content Delivery System:** Allows the Remote distribution of firmware, iR options and MEAP applications; Remote User Interface (RUI) Web based interface to each device that helps to provide remote device management and control

### Scanning software

**Network ScanGear:** TWAIN-compliant scanner driver that enables computers on a network to use the pull scan functionality of the device
