

Technical Sheet of Microscope Slide

1. Product introduction

The microscope slide is used in routine laboratory and clinical microbiology, the application fields include histology, pathology, cytology, hematology microbiology, etc. The microscope slide is made of Float glass. The size of microscope slide is 1"x3" (25.4x76.2mm). It is clean and degreased.

2. Specification

Cat. No.	Description	Size	Thickness
7101	Ground Edges	25.4x76.2mm	1-1.2mm
7102	Cut Edges	25.4x76.2mm	1-1.2mm
7103	Single Cavity, Ground Edges	25.4x76.2mm	1-1.2mm
7104	Double Cavities, Ground Edges	25.4x76.2mm	1-1.2mm
7105	Ground Edges, Frosted One End One Side	25.4x76.2mm	1-1.2mm
7105-1	Cut Edges, Frosted One End One Side	25.4x76.2mm	1-1.2mm
7106	Ground Edges, Frosted Two Ends One Side	25.4x76.2mm	1-1.2mm
7107	Ground Edges, Frosted One End Both Sides	25.4x76.2mm	1-1.2mm
7107-1	Cut Edges, Frosted One End Both Sides	25.4x76.2mm	1-1.2mm
7109	Ground Edges, Color Frosted One End One Side, White, Orange, Yellow, Green, Pink, Blue, etc.	25.4x76.2mm	1-1.2mm

3. Product Requirement

The microscope slide should be no adhesion phenomenon.

The microscope slide should be transparent and colorless.

The microscope slide should be clean and degreased, no mist, fingerprint or other defects.

The microscope slide should be no pits, no bubble, no strips, no inclusions, no pitting and no scratches.

The microscope slide should be smooth, the edges should be polished.

The microscope slide should be flat, no curling.

The chemical performance should be stable and should be able to withstand atmospheric corrosion.

The microscope slide should be wettability.

After boiling test, the microscope slide should be no bubbles or cracks.

4. Packing Detail

50pcs/box, 50bxs/ctn
