

CMLFF260 Specification Sheet

Description

Our compact laboratory combi fridge freezer is the perfect 2 in 1 solution to laboratory refrigeration. Storage capacity is a surprisingly spacious 47L for a product this size. The fridge section is fitted with 3 shelves (2 large, 1 small) and a high quality temperature controller, which accurately monitors the internal temperature levels, displaying them clearly on the LED screen on the front control panel. The fridge has a capacity of 145L and is lockable, to ensure security of the contents if required. The combi freezer has a capacity of 115 litres – optimum space for storage. It is fitted with 3 wire baskets (2 large and 1 smaller at the bottom). The high quality temperature controller constantly modifies and stabilises the temperature, with the external LED temperature indicator providing accurate information on the inner temperature levels. The appliance can be locked to secure the products placed inside it.

- +2°C to +10°C & -16°C to -24°C temperature range
- Core temperature display, represents your vaccine vial through ICOOL temperature probe
- External digital controller and temperature display
- Battery Back up
