Re: Satel products' country of origin

Dear Sir/Madam,

This letter is to confirm that all products manufactured and supplied by Satel Sp. z o.o. are developed and manufactured in Gdansk, Poland, in strict compliance with the EN 50131 and ISO 9001:2015 quality standards.

Any products presented to the customer or end user of any country of origin, other than Poland can be considered as a counterfeit since Satel does not have any other production facility outside of Poland.

Each product's order is accompanied with the Poland Certificate of Origin which may be endorsed by the C/O or EUR-1 certificate issued by the national Polish customs office, upon request. Such request must be submitted at the time of Purchase order placement. Due to the fact that exchange rates have a significant impact on calculations for C/O or EUR-1 certificates, it may happen that some products will be excluded from the rule.

With best regards,

Satel[®]
80-298 Gdansk, ul. Budowlanych 66
