

endoCleaner

FULLY AUTOMATIC ENDOSCOPE WASHER & DISINFECTOR

Offering **safe and high-performance** washing and disinfection conditions through **advanced technology**.

endoCleaner is a **state-of-the-art device** designed for the effective and safe **washing, disinfection, and drying** of endoscopes.

With advanced features like **Radio Frequency Identification (RFID)**, **effective disinfection**, and **comprehensive reporting**, **endoCleaner** provides optimum standards in the reprocessing of endoscopes.

Discover the Innovative Features

endoCleaner is the leading solution for endoscope cleaning and disinfection. Its innovative features, user-friendly interface, and environmentally friendly design offer unmatched performance and peace of mind to healthcare professionals worldwide.

Efficient Washing and Disinfection Process

SEE IT IN ACTION

RFID and Traceability

- **Automatically records** endoscope serial and model numbers, along with operator identification **via RFID**.
- Ensures efficient **tracking of disinfected devices and operators**.
- Tracking of disinfectant liquids.
- Tracking of consumables (filters).

Environmentally Friendly Technology

- **endoCleaner** features an innovative **Eco³ design (ecological, ergonomic, and economic)** that uses minimal water and disinfectant.
- **endoCleaner**, using the **least amount of water and disinfectant in its class**, offers an eco-friendly solution to the water ecosystem by enabling smarter water usage.
- It **reduces the carbon footprint** by using 10 liters of disinfectant per cycle.
- **endoCleaner** can use all non-foaming automatic machine disinfectants. **It provides brand independence and economic & flexible working opportunities.**

User-Friendly

Interface

- Featuring **intuitive touch buttons** and an **LCD information screen with over 120 smart functions**, **endoCleaner** boasts a powerful mechanical and electronic design.
- With the **Direct Suction Tank feature**, users can **monitor the amounts of disinfectant, enzymatic, and alcohol**.
- Written and audible alerts are available on the touchscreen to easily track when disinfectant filters and liquids need replacement. These **alerts enhance operational efficiency** in accordance with reprocessing protocols.
- **The leakage test function, applied throughout the entire cycle**, aims to protect patient and user health by detecting potential leaks in the endoscope at an early stage.

Comprehensive Reporting

- All steps of the washing and disinfection process are meticulously tracked and **can be printed via an integrated printer**.
- Optionally, all steps can be sent as a detailed report to the **MedGate MIP** software for **printing and archiving on the MedGate MIP server**.
- **endoCleaner** stores essential data such as **disinfection duration, endoscope and user information, and success indicators**. This information is crucial for maintaining and documenting accreditation standards.
- Data stored in **endoCleaner** can be seamlessly transferred to computers or network systems using

any desired method, **facilitating streamlined record-keeping and analysis.**

- The **endoCleaner Disinfection Tracking System (EDTS) application**, which can be easily installed on computers connected to the device, **enhances monitoring and documentation processes.**

Versatile Compatibility

endoCleaner is **compatible with all leading endoscope brands models of flexible endoscopes** (e.g., gastroscopes, colonoscopes, duodenoscopes, enteroscopes, endosonography devices, bronchoscopes, autofluorescence bronchoscopes, etc.)

The connectors we produce as a result of our R&D work are **100% compatible with all flexible endoscopes.** This ensures no liquid leakage from channels and no reduction in liquid pressure.

Excellence with Our Quality Assurance

Developed through collaborative research and development efforts, **endoCleaner** represents the pinnacle of product and service quality.

This product, manufactured by **AORT**, embodies excellence in design, functionality, and reliability.

It is fully compliant with **EN ISO 15883-1** and **EN ISO 15883-4** standards.

Experience the difference with
endoCleaner – the ultimate
solution for endoscope reprocessing.
