

Trailer UMS 2588

UMS trailers are designed taking into account the peculiarities of Ukrainian roads. The supporting frame is made of steel profiles with large sections. Protected against corrosion by double-sided hot-dip galvanizing (external and internal cavities). Precise adjustment of the lodgment under the contours of the hull of your craft. Accessories (couplings, winches and torsions) of AL-KO Germany. LED moisture-proof optics (LED) are permanently mounted on the trailer. A complete package of documents is provided for trouble-free registration.

Features:

Length, m - 9,2

Width, m - 2,5

Weight, kg – 850

Gross weight, kg – 3500

Winch, kg – 900

The maximum length of the transported boat is m - 8,7

Two-axle trailer with torsion bar with brakes for transporting boats and yachts up to 8.7 m long (UMS Tuna 865 Cabinet).

With the braking system you will feel more comfortable when cornering and braking. The trailer is also equipped with a parking and emergency brake.

Corrosion-resistant zinc or powder coating, double wiring insulation, German-made components, adjustable bearings, 4 side steps, middle tropics, nose rest and running gear - these are the elements that will give you maximum comfort when operating the trailer.
