R A N G E

for a delicate touch...

There are now six handle and thirteen blade options in the Swann-Morton "Fine" range – especially developed for delicate surgery. The stainless steel, slim barrel handles are available in four lengths – 130mm (SF1), 103mm (SF2), 78mm (SF3) and 53mm (SF4). The 130mm and 103mm handles are also available with an independently screwed top section to make blade-changing even easier (handles reference SF13 and SF23).

Certificate No: PM 14713

The precision-made stainless steel blades offer a wide range of cutting-edge options, including the single-bevel SB61 and SB62, and the spear-point SP90 and SP91. "Fine" handles are available singly in plastic wallets. Blades are supplied individually foil-wrapped in boxes of 25. Blade sterilisation is carried out under strict laboratory conditions in Swann-Morton (Services) Limited's Cobalt 60 Continuous Irradiation Plant.
