|--|--|--|--|---|---|
| | | | | <ul style="list-style-type: none"> -Collaborate with remote teams using improved remote desktop support for VCL and IDE; -High-DPI support (4k+) in the IDE, and cleaner and sharper fonts; -macOS 64bit ARM compiler and toolchain that can build universal binaries including Intel/ARM versions for AppStore submissions. - Support for the latest Android API and latest Billing APIs, and migration to use the AndroidX libraries. Android support for multiple classes.dex files, simplifying integration of external Android dependencies; - Connect to over 20 databases natively with FireDAC's high speed direct access, including InterBase, SQLite, MySQL, SQL Server, Oracle, PostgreSQL, DB2, SQL Anywhere, Advantage DB, Firebird, Access, Informix, MongoDB and more;- - Smarter code navigation when refactoring. Auto code completion. LSP awareness of Include files. Auto restart of LSP server. Class helper support. Array suggestions when assigning arrays; - VCL Styles with design-time support: Prototype stylish UIs even faster by seeing immediately at design-time how your styled forms and controls will look when running; - Develop both server and FireMonkey GUI applications for Linux; - Reduces the complexities of rapidly building and deploying a multi-tier turn-key enterprise REST API application server with Swagger support. <p><u>Technical Specifications&Requirements:</u></p> <ul style="list-style-type: none"> - C++ and Delphi development support in single IDE; | <ul style="list-style-type: none"> -High-DPI support (4k+) in the IDE, and cleaner and sharper fonts; -macOS 64bit ARM compiler and toolchain that can build universal binaries including Intel/ARM versions for AppStore submissions. - Support for the latest Android API and latest Billing APIs, and migration to use the AndroidX libraries.
