Profile

Detail-oriented QA Engineer with hands-on experience in manual and automated testing of web applications. Skilled in designing and executing comprehensive test cases, identifying defects, and ensuring product quality across the software development lifecycle. Proficient in working with tools such as Jira, Cypress, and SQL to validate functionality and performance. Strong understanding of Agile methodologies and collaboration within cross-functional teams. Passionate about improving user experience through precise testing strategies and continuous process optimization. Eager to contribute to delivering reliable digital products and to grow into a lead QA role, mentoring junior testers and enhancing testing practices.

Employment History

QA Engineer | Infnitech DEV

APRIL 2021 – OCTOBER 2024

Led manual and automated testing efforts for a tourism web application, ensuring the functionality of travel planning services and newsletter generation, as well as projects in the hospitality (HORECA) and recruitment sectors. Developed and maintained automated test suites using Cypress and Gherkin, which improved regression test efficiency by 40%. Created and executed detailed test plans, checklists, and test cases to achieve comprehensive test coverage. Collaborated closely with development teams to resolve critical issues and managed bug tracking in JIRA, ensuring smooth and successful product releases. Possess a strong understanding of the SDLC and modern development methodologies, with a focus on delivering high-quality, reliable software solutions.

QA Engineer | Amigo Studio

OCTOBER 2024 – PRESENT

Performed comprehensive testing of web applications, focusing on layout (UI/UX) validation, SEO compliance, admin panel functionality, and frontend components. Worked extensively with databases to validate data integrity and consistency. Designed and executed API tests using Postman, ensuring reliable backend–frontend communication. Collaborated with developers and product teams to identify and resolve issues across the full stack, contributing to stable and high-quality product releases.

Education

Bachelor's Degree in Information Technology, TECHNICAL UNIVERSITY OF MOLDOVA (UTM)

SEPTMEBER 2019 – MAY 2024
