

COMPANY PROFILE

**Leading To A
Brighter Future**

About the Company

Planton Solutions is a software company that was founded in Canada in 2002 but since 2010 has been head-quartered in Moldova.

We started our journey by specializing in implementation, development, maintenance and consulting services for the financial sector.

While we still work with our respected clients in the banking industry, our new products are designed to serve any industry that has to deal with the management of large amounts of data and company digitalization.

We are experienced business and technical consultants who have many years of development & implementation in process automation technologies.

Our Vision

To make life easier for our customers by helping them save cost and time, and reducing their dependency on specialist programmers.

Our Mission

Working hard every day to develop high-quality products and services that will help companies automate their processes more quickly and retain more control over that automation.

Our Values

Quality

We are committed to creating the best functional products that deliver real and enduring value to our customers.

Respect, integrity and honesty.

We believe that being truthful about our work in relationship with others is the only way to create beautiful things. A trusting relationship with each other is a necessity.

Valeriu Tonu
CEO Planton Solutions

What We Do

Unlike most software companies, we realize that *just writing code is not enough*. That's why we provide - and offer as standalone services - ALL the necessary accompanying activities: Design; Testing; Documentation; Project management; and, of course, Support.

We develop professional software and offer a full range of related services.

The extensive experience within our team allows us to very quickly get an in-depth understanding of client needs.

We then strive to deliver products that match our promise: products that allow you to streamline and simplify your business processes and manage your data far more efficiently.

We are highly professional people with a talent and passion for what we do!

We enjoy the process of finding out what challenges and obstacles a company is facing and offering the correct solutions to overcome them.

We are always trying to understand you, your business and your customers - that is the bedrock upon which we build.

We offer...

System Architecture and Design

Development

Project Management

Complete Turnkey Systems

Testing and Quality Assurance

Technical Documentation and Training Services

Application Maintenance

Our Products

Sysbupro is Planton Solutions' low-code platform that helps companies in any type of industry to automate their business processes.

Secure. Scalable. Robust. Host in the cloud or on-premises. Build applications with no or far less coding. Go from workflow design to operational app.

Allows business users more control over the applications they use.

RECONWIZZ

Reconwizz is a reconciliation application developed in partnership with AdVision Finance, NL. It allows linking unlimited sources of data in one application. It can run scheduled tasks, reports, and automatic matching rules to simplify financial institutions' reconciliation process. This app is intended to be used for all industries that require data reconciliation.

"We worked with Reconwizz team to implement the solution at our partner bank in Malawi. Reconwizz made it possible to greatly improve the efficiency of the reconciliation process and give more insights in the accounts used by our digital channels. Reconwizz also helped a lot in the way of thinking about our processes; while implementing in the application we have made several important changes in our front and back office processes that improved the operational efficiency of our customer services as well."

RALPH MEELHUYSEM
(Product Manager Payments)
RABOBANK, THE NETHERLANDS

"With Sysbupro we turn 'dull' KPIs from an existing daily process report into beautiful charts showing trends over time. Our clients love the new visuals and we can see where proactive actions are needed. Building the site ourselves was easy - we are excited to think how Sysbupro can help us elsewhere in our business."

ANDREW BEALE,
HEAD OF PROJECTS AT RJB SYSTEMS,
LONDON, UK

CES COMMUNICATIONS

CES construction company is using Sysbupro as their payroll system, material and transportation evidence, reporting and profitability tool.

BUSINESS INTELLIGENCE

Planton Solutions' Business Intelligence application was designed to be a simple and at the same time powerful tool performing large data analysis and create reports, summaries, dashboards, graphs, and charts to provide users with detailed intelligence about the nature of the business.

CORE BANKING SYSTEM DASHBOARD

Sysbupro is used by RJB Systems, a Temenos T24 Core Banking System support business, providing comprehensive dashboard-style charts to its clients visualizing key indicators of the services they provide, and system performance.

Our T24 Products

Applications developed for Temenos T24 Core Banking System.

PT Generic Accounting

Accounting module designed to allow the passing of a single transaction with multiple accounting debits and credits.

PT WOF

Track and repay written off loans.

PT Delivery

Trigger events in T24 and generate customizable output for SMS, EMAIL and other delivery channels.

PT ILT

Individual Loan Tracking for Groups.

PT Authority Level

Restrict user operations by custom conditions.

PT CRB Export

Export daily detailed Transaction Journal and Consolidated Movements, which can be used by accountants to determine necessary transactions and identify any accounting problems in T24.

EZ DEPLOY

Easily export information and/or developments from one environment and import it into a different one.

PT Reporter

Reporting module allowing the design and generation of reports in more flexible formats and styles.

PT Schedule Simulator

A visual tool for creating and manipulating loan schedules.

PT STO

Standing order module which allows users to define unlimited standing order instructions on accounts.

PT Bridge

Back-end software that links any external system to T24.

PT Schedule Simulator

A visual tool for creating and manipulating loan schedules.

"I've been working with Planton Solutions for more than 19 years, on different projects: T24 implementation and customization, systems interface development or new applications development. Planton team never disappointed. Always delivered as per requirements, ensured timely support and maintenance. They are reliable, flexible and always responsive."

Diana Cazacu,
CEO ADVISION FINANCE, Netherlands

Our Projects

CARD INTERFACE WITH EURONET

This card interface has been developed for Opportunity Bank of Malawi to integrate its core T24 ABS with Euronet Services' system.

CARD & POS INTERFACE

A card and POS interface has been developed for Vision Fund Tanzania which integrates card ISO8583 message type and custom POS protocol provided by local bank CRDB and Temenos T24. Besides a pure interface facility and stand-in mode, users can login to the system using the web interface to see transaction status, reports and dashboards.

SALESFORCE INTERFACE T24

A Salesforce interface for T24 has been developed for Opportunity International, acting as a bridge between the Salesforce Agriculture Finance module and Temenos T24.

T24 IMPLEMENTATIONS

Planton Solutions has participated in many Temenos T24 core banking system implementations as the primary development resource.

Some of these are:

- National Bank of Vanuatu
- Vision Fund International sites in Tanzania, Uganda, Zambia, Ghana
- Advision Finance
- Urwego bank (Rwanda)
- Fonkoze bank (Haiti)
- Opportunity International Banks in Mozambique, Columbia, Malawi Kenya, Serbia, India, Rwanda
- Oportunidad Microfinanzas

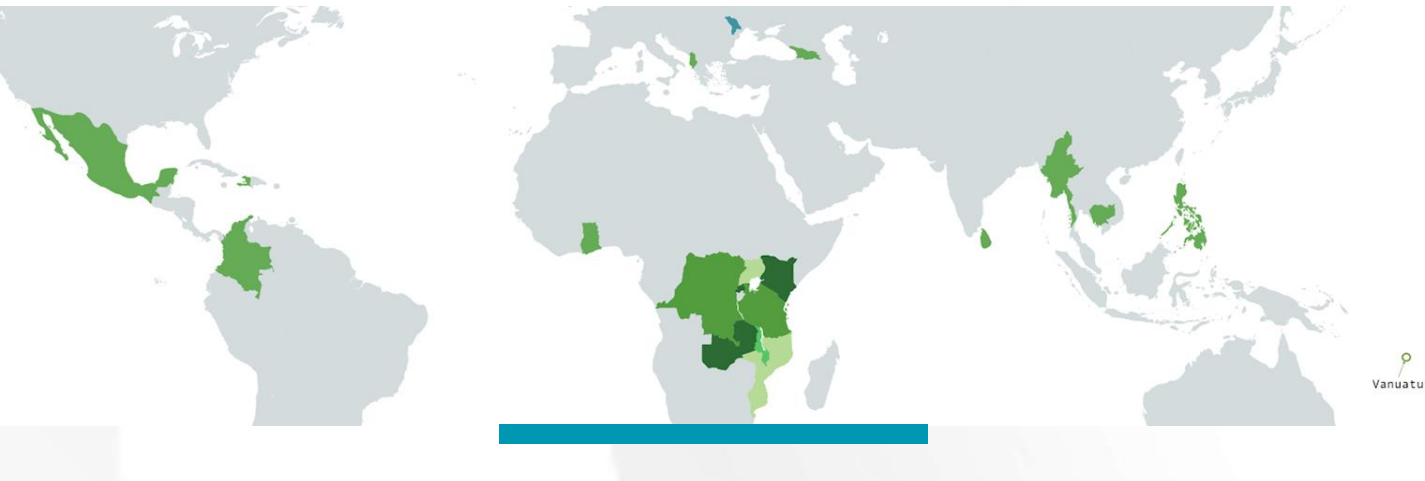

"The T24 core banking system was successfully launched and fulfilled original expectations. The Planton team was communicative and effective in completing the project. The T24 system is available in the Amazon cloud, and we're thrilled with the final product. They were a highly efficient team to work with. They were strong communicators — whenever I had an issue they were available. Additionally, they were timely in getting deliverables to us. Planton products are easy to work with."

Philliam Mwesigwa,
Chief of IT
VISIONFUND UGANDA

Our Clients

We are very thankful for the trust we have from our clients worldwide. Over the years, we have met many new and interesting people, worked on fascinating projects and over the years our clients have very often become our friends.

Thank you.
