

REF ANT200200L

Product Name: CT Dual Head Injector ANT200200L

Intended for Use: The CT Dual Head Contrast Media Injector is used to inject contrast media and saline into patients during CT scans. It helps improve image quality for diagnostic purposes. The device is for use by trained medical staff in hospitals or clinics.

Technical specifications:

Description	Detail
Installation type	Pedestal
Power supply	100-240VAC, 50/60Hz, 200VA
Pressure limit	325 psi
Phases	6
Flow rate	0.1~10 ml/s
Syringe volume	2- 200 ml syringes
Auto-filling rate	8 ml/s
Console	12.1-inch LCD touch console
Hand switch to control injection	Hand switch to start and stop injection
Communication mode	Wireless communication, no cables
Injection protocols storage	2000
Remote control	Remote control operation from the tomography control room
Injector head waterproof function	Yes
Heater	Yes
Injection time display	Real-time display
Injection pressure curve display	Real-time display
Injection volume display	Real-time display

IV Pole: Optional

Components

Part	Description	Qty
Scan room unit	Injector	1
Control room unit	12.1" Touch screen	1

Packing

Attribute	Material
Packaging material	Synthetic-board wooden box
Carton dimension	146 x 68 x 70 cm
Carton weight	81 kg
