

Accessories - Medium Steam Sterilizers

Options and Accessories – Customize Your Autoclave

Printer – Each cycle is documented by the integrated printer which records the preset and actual parameters of the cycle: the selected sterilization or test cycle, cycle parameters, date, time, temperature, pressure, errors, etc.

SD card – Sterilization cycles' data can be collected online on a SD Card through an optional SD Card Slot. Collected data can be downloaded into a computer equipped with proprietary PC Software.

Pressure gauge – Analog pressure gauge installed on the front of the sterilizer machine to indicate chamber/jacket/steam generator pressure in addition to the LCD Display.

Air detector – To check and detect insufficient air-removal and non-condensable gases in the steam.

Reverse osmosis system (water softener / water purifier) – A Reverse Osmosis system shall be used to improve the quality of the water used to generate steam in the electric steam generator and to secure fully automatic operation. The use of mineral-free water will contribute to better performance and longer life of the autoclave's chamber.

Slow exhaust cycle – For sterilizing liquids according to EN285, with natural cooling and an additional PT100 temperature probe.

HMI PC software (Monitoring and Documentation Software) – Powerful PC Windows based software is available for monitoring, logging sterilization cycle parameters, and providing complete control and service over the autoclaves.

Cabinet – Stainless steel standing or rolling cabinet with storage area under the unit

Chamber plate – To accommodate sterilization baskets or containers inside the chamber and to prevent scratches on the chamber's surface.

Tray holder and trays – Stainless steel tray holder with up to 4 trays.

Sterilization containers and wire mesh baskets – Aluminum sterile containers and stainless steel, stackable wire mesh baskets are available in different sizes.
