## Hemodialysis catheterization kits

· Hemodialysis catheterization kits are providing temporary vascular access for hemodialysis until a permanent access is available or until another type of dialysis therapy is substituted. Hemodialysis catheters are usually placed in deep veins such as the neck (jugular vein) and chest (subclavian vein) through the Seldinger technique.

## FEATURES

- Soft-tip designed to reduce vessel trauma during insertion;
- Medical grade material ensures the highest level of safety < Derivative knowledge: (1) the biggest difference between medical and non-medical materials - polymer materials for medical products must be

Our short-term catheters guarantee less release in high temperature and humidity environments than most similar products) >;

- Available in straight and curved models, and the curved one is easier to operate usually;
- Low blood salvage efficiency, reduce the recovery of fresh blood, and improve hemodialysis efficiency;
- Catheter softens at body temperature and provides excellent performance of insertion;
- Features radiopaque materials that enable quick visualization and correct placement of the catheter tip;
- Optional kink-resistant guidewire that increases clinician confidence;
- We can supply kink resistance nitinol guide wire to increase clinician confidence.

## CONTENTS

Catheter, Dilator, Guidewire, Clamp, Injection cap, Syringe, Introducer needle, Scalpel
