

## Disposable Silicone Laryngeal Mask Airway 一次性硅胶喉罩

A laryngeal mask airway (LMA), also known as laryngeal mask, is a medical device that keeps a patient's airway open during anesthesia or while they are unconscious. It is a type of supraglottic airway device. They are most commonly used by anesthetists to channel oxygen or inhalational anesthetic to the lungs during surgery and in the pre-hospital setting (for instance by paramedics and emergency medical technicians) for unconscious patients.
