This equipment has been tested and found to comply with the limits for a **Class A** digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial non-residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause harmful interference with radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. There is no guarantee that interference will not occur in a particular installation.

The FCC regulation §15.21 provides that changes or modifications not expressly approved by the responsible party could void user authority to operate this equipment. Expected and expressly approved modifications include all procedures covered by the user manual, such as changing memory or hard drive or utilization of expansion slots or connectors. This equipment was tested in a typical configuration.

In accordance with FCC §2.1074, this equipment's unique regulatory compliance identification is provided by the Regulatory Model and/or Regulatory Type. These regulatory compliance identification markings are on the regulatory label affixed to your equipment and should not be confused with marketing name or model of the equipment. To facilitate positive identification, request for regulatory compliance information for this equipment should include the Regulatory Model and/or Regulatory Type. This equipment may be marketed under one or more of the makes and/or marketing names/models of the wholly owned Dell Inc. subsidiaries and brands.
