### INSTRUCTIONS FOR USE PERSONAL PROTECTIVE EQUIPMENT (P.P.E.)

This P.P.E. manufactured by SIOEN NV is in compliance with EU Regulation 2016/425 and Regulation 2016/426 on personal protective equipment as they apply in GB, as amended. Read the User's Instructions before you use this P.P.E.!

Due to the multitude of combinations of standards and EU languages it is ecologically irresponsible against the environment to print the manual in paper and charge it to the consumer. Therefore we do not print the manual. When requested the manual can also be ordered free of charge from SIOEN or from our Distributor. You can also find the latest full versions (different versions depending on covered standards) of the user's manual / instructions, as well as the Declaration of Conformity, in the EU/UK language(s) of your choice on our website: <http://sio.to/eudoc>

Safety Information essential when receiving P.P.E.:  
more, full instructions at <http://sio.to/eudoc>

	Limited Chemical Protection
	Thermal Insulation Electric Arc
	Welding & Related Processes
	B: Convective Heat C: Radiant Heat D: Spontaneous Combustion E: Molten Iron Splash F: Contact Heat
	UV Protection
	Knee protectors

Check the pictograms (and optional EN/ISO/IEC national standard protective classes) on the label of this P.P.E. for its specific protective properties. An icon (picto) is standard not present on the label, this means that the protection is not guaranteed. The level of protection offered by each icon is shortly described below. Full information, incl. meaning & limits of the protector classes, can be found at <http://sio.to/eudoc>.

Follow your manufacturer's instructions concerning P.P.E., following the risk analysis and use it only for the intended use as per the user's manual. Check restricted use at <http://sio.to/eudoc>.

Select the correct size so that work can be carried out comfortably & comfortably. See <http://sio.to/eudoc>. Only parts of the body covered by this P.P.E. are protected.

If you see this picto on the label, check the expiry date.

Making alterations to the clothing/P.P.E. without authorisation of Sioen is not permitted.

For antistatic P.P.E. It is important that all underlying non antistatic garments (from head to toe) are covered with antistatic clothing and properly earthed (e.g. by antistatic footwear).

P.P.E. clothing must be worn completely and correctly.

Check compatibility with other Clothing/P.P.E. (interfaces, overlap when moving,...) and working equipment. Read their Instructions.

P.P.E. Clothing must be regularly inspected and cleaned, maintained and repaired if needed by a professional as required by the relevant standard. End of Life of Service (End Of Life). Don't use/reuse damaged or heavily soiled P.P.E. Reserve the storage instructions (dry or vented, unopened, or direct sunlight), see <http://sio.to/eudoc>.

Select the correct size so that work can be carried out comfortably & comfortably. See <http://sio.to/eudoc>.

P.P.E. Clothing must be regularly inspected and cleaned, maintained and repaired if needed by a professional as required by the relevant standard. End of Life of Service (End Of Life). Don't use/reuse damaged or heavily soiled P.P.E. Reserve the storage instructions (dry or vented, unopened, or direct sunlight), see <http://sio.to/eudoc>.
