Universal Scissors for Cutting Clothes 18 cm (Black) - Achievement

The 18cm universal clothes scissors are an indispensable tool in the field of medicine and healthcare.

To use the 18cm universal clothes scissors, simply hold the handle firmly and apply gentle pressure to cut the desired material.

The scissors' sharp, pointed blade allows for a precise and clean cut, preventing tearing or damage to the material. Furthermore, their compact 18 cm size makes them easy to handle and carry.

It is important to note that these scissors are designed exclusively for medical use and should not be used for other purposes.

After each use, it is recommended to clean and disinfect the scissors properly to maintain hygiene and prevent the spread of bacteria or other microorganisms.

In summary, the 18cm universal clothes scissors are an essential tool in the field of medicine and healthcare.

Its precise design and ability to cut and manipulate different textile materials make it a reliable and convenient option for healthcare professionals and caregivers. Be sure to follow the usage and maintenance instructions to ensure its durability and effectiveness.

Designed with precision and quality, these scissors are specially designed for cutting and handling different types of textile materials, such as bandages, gauze, dressings, and clothing.
