Expert opinion

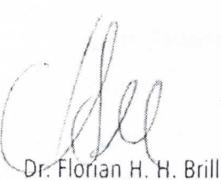

Yeasticidal Activity of **HMI Tabidez 56** in the quantitative suspension test according to DIN EN 13624:2013 (Phase 2, Step 1)

The disinfectant **HMI Tabidez 56** was tested and evaluated according to DIN EN 13624:2013 „Chemical Disinfectants and Antiseptics - Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity in the medical area - Test Method and Requirements (Phase 2, Step 1)“.

According to the test report no. L16/0808.6 dated 23/02/2017 of Dr. Brill + Partner GmbH the preparation showed yeasticidal activity under clean conditions.

HMI Tabidez 56 complies with the requirements of DIN EN 13624:2013 (phase 2, step 1) with the following concentration-time relationship:

Yeasticidal:	clean conditions	1 tablet/10 L	15 minutes
	clean conditions	1 tablet/20 L	15 minutes

Expert opinion

Activity of HMI®Tabidez 56 against MNV in a quantitative suspension test according to the EN 14476:2013+A1:2015 under clean conditions

This expert opinion is based on the test report L16/0811M.1 dating 27/01/2017.

The virus-inactivating properties of the surface disinfectant HMI®Tabidez 56 of Hygiene Medical Industry Co. Ltd. against murine norovirus (MNV) were investigated by a quantitative suspension test according to EN 14476 under clean conditions.

According to EN 14476, a disinfectant or a disinfectant solution at a particular concentration is considered as having virus-inactivating properties if within the recommended exposure period the titre is reduced by $\geq 4 \log_{10}$ (inactivation $\geq 99.99\%$).

HMI®Tabidez 56 was examined undiluted (1 tablet / 5 litres) and as 50.0 % solution (1 tablet / 10 litres) at 20 °C. 5 and 15 minutes were chosen as exposure times. In summary, a virucidal activity against MNV was measured as follows:

undiluted (1 tablet / 5 litres)	5 minutes	clean conditions
---------------------------------	-----------	------------------

50.0 % (1 tablet / 10 litres)	15 minutes	clean conditions
-------------------------------	------------	------------------

Expert opinion

Bactericidal Activity of HMI Tabidez 56 in the quantitative suspension test according to DIN EN 13727:2015 (Phase 2, Step 1)

The disinfectant **HMI Tabidez 56** was tested and evaluated according to DIN EN 13727:2015 "Chemical disinfectants and antiseptics - Quantitative suspension test for the evaluation of bactericidal activity in the medical area - Test method and requirements (phase 2, step 1)".

According to the test report no. L16/0808.1 dated 23/02/2017 of Dr. Brill + Partner GmbH the preparation showed bactericidal activity under clean conditions.

HMI Tabidez 56 complies with the requirements of DIN EN 13727:2015 (phase 2, step 1) with the following concentration-time relationship:

Bactericidal:	clean conditions	2 tablets/10 L	5 minutes
	clean conditions	1 tablet/20 L	15 minutes
