

200T/H

MAGLUMI® X3

Fully-Automated CLIA Analyzer

**Save Your Space
Without Compromise**

For 26 Years, We Know Users' Pain Points

Requirements

Pain Points

Insufficient laboratory space

High space efficiency

Poor stability of results

High performance

Complicated manual operation

High intelligence

High instrument failure rate

High reliability

High reagent & consumables cost

Cost-efficient

X3 Parameters and Comparison

PART

1

MAGLUMI[®] X3 General Specification

Suitable for small to medium-size labs or hospitals.

Throughput: **200** tests/h

On board capability: **72** samples

Reagent position: **20**

Incubation position: **80** tests (single cup design)

Reaction cup loading in one time : up to **364**

Continue to use **MAGLUMI®** reagent kits (**211** parameters)

No-pause Samples/Reagents/Reaction Cup loading/unloading

Combination of Two Advantages

***One of the Highest Space
Efficiency CLIA Analyzer –
200 T/H, area < 0.68 m²***

***One of the Broadest Automated
CLIA Test Menu –
211 Parameters***

[illegible]

Reagent kits are compatible with all models

- Continue to use MAGLUMI® reagent kits with perfect compatibility
- No worries for the problem of reagent registration

- Other company's reagent kits may not be compatible with all of their instruments.

High-tech components create excellent performance

Single Needle Design, Coated with Teflon

- An independent washing unit for the needle, with different washing modes depending on different assay, to avoid carryover ($\leq 10^{-5}$)
- Liquid level /clot/ crash detection

Accurate Incubation Technology

- Single cup design with five-sided heating at $37 \pm 0.3^\circ\text{C}$, ensuring accurate, quick and uniform incubation.
- Incubating 80 cuvettes simultaneously
- Non-contact mixing with different modes before incubation, ensuring sufficient reaction.

High-Efficiency Washing Technology

- 4-step independent washing unit, reducing non-specific binding to improve sensitivity
- Three of non-contact mixing units with different mixing modes

Super Stable Measuring Chamber

- PMT with heating and cooling function, ensuring the detection precision
- Independent measuring room, avoiding light cross contamination

No-Pause Reagents Loading/Unloading

Without waiting or interrupting tests, the whole process only needs **5 seconds**

“Watch”

Check the color of the indicator, no color or green indicates a free position

“Draw out”

Draw out the idle reagent kit

“Insert”

Insert the reagent kit

“Scan”

Scan the reagent label by
RFID reader

No-Pause Samples Loading/Unloading and STAT Mode

Sample area

Sample positions: 72

Sample tracks: 6

We can draw out the sample tracks when the sampling action is done (the indicator light shows green), and then we can insert the new sample track at any time, **to achieve no-pause sample loading/unloading without any waiting or operational interruption.**

Samples in each sample track can be defined as STAT and can be tested in priority

Intelligent Washing function

Magnetic separation and non-contact vortex mixing unit

Just Like

Smart washing machine

- ▶ **Three of non-contact vortex mixing units** in washer, with different mixing modes depending on different assays, **ensuring a sufficient washing to reduce the non-specific binding.**

- ▶ Just like a smart washing machine, there are different washing mode, such as **DELICATES mode, COTTON mode, WOOL mode or others.** Choose different modes according to what clothes you want to wash.

Intelligent Washing function

Sampling needle washing

- ▶ **One** independent washing unit for the sampling needle, with different washing modes depending on different assays.

Waste needle washing

- ▶ **Four-step independent** washing unit, reducing non specific binding to improves sensitivity

Super Sensitive and Stable Measuring Chamber

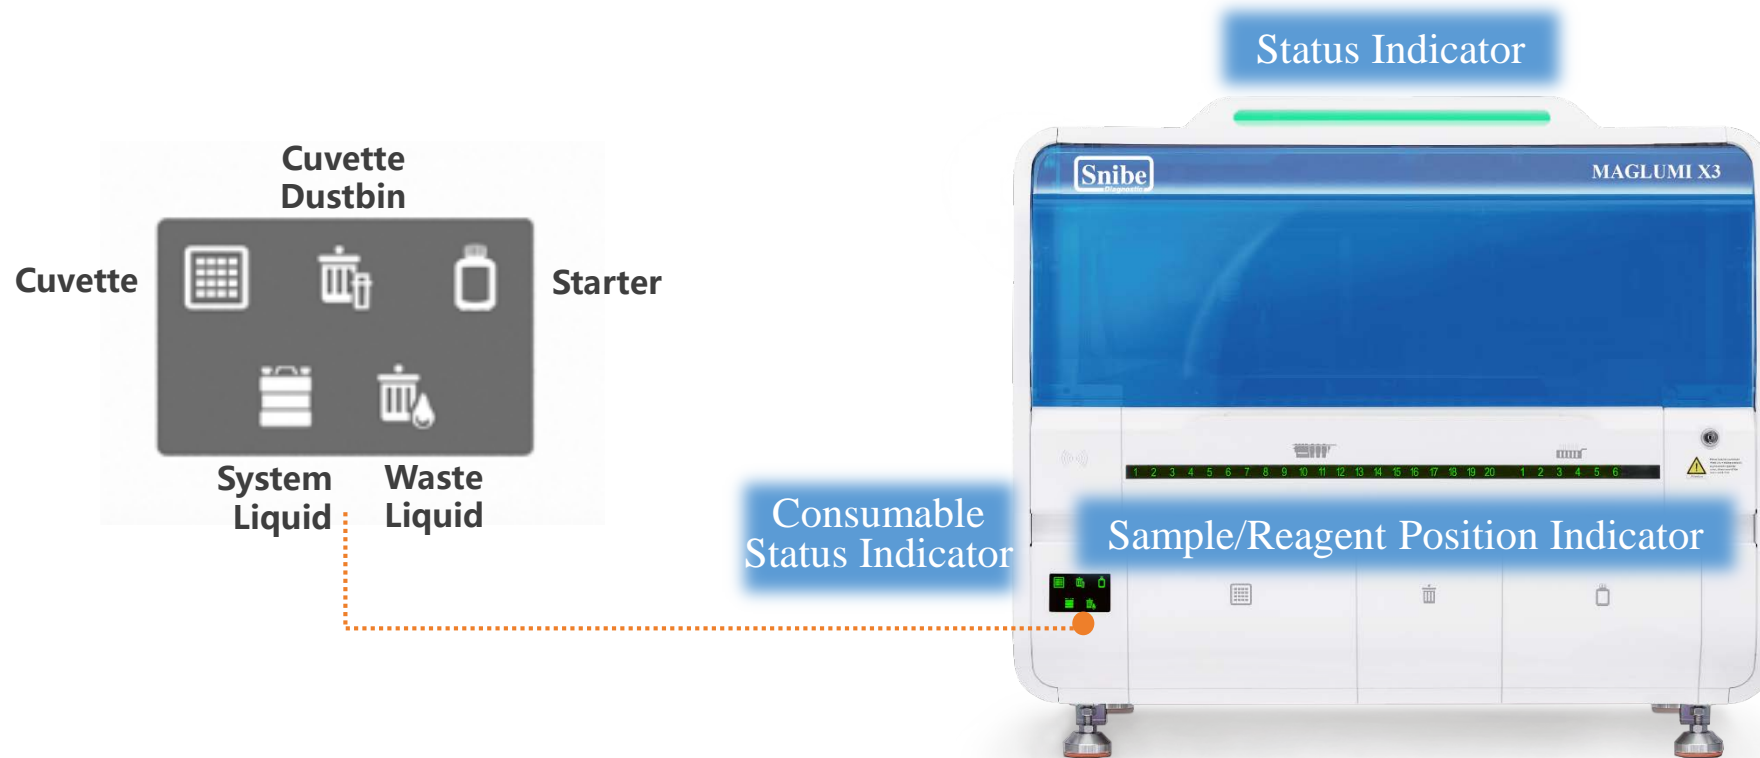

Bidirectional Temperature Control Technology

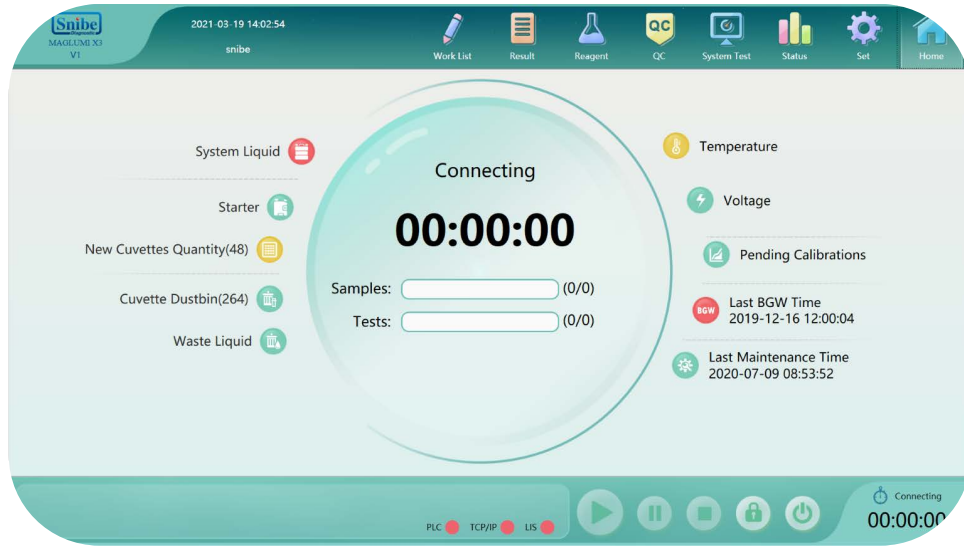

- Automatic temperature control to keep a stable background value, not affected by ambient temperature, to ensure the accuracy of measurement results.

Convenient Management of Analyzer Status

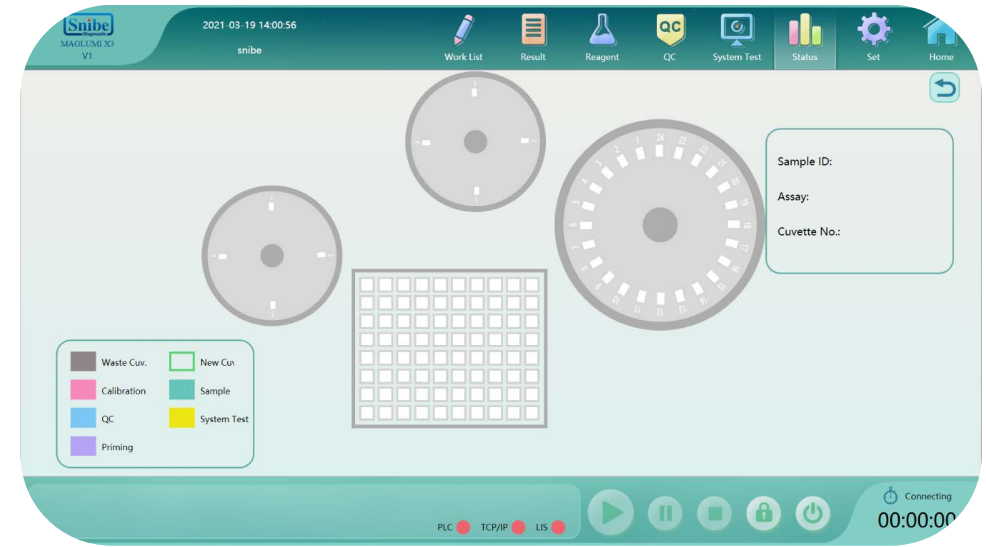

- The user no need to stay with the analyzer and focus on the monitor.
- You can know the status by looking the analyzer from a distance!

Intelligent UI interface

New **user-friendly** UI interface

Real-time display for monitoring each test procedure, reagent and consumable quantities

Top 10 Highlights of MAGLUMI® X3

- ① One of the highest space efficiency CLIA analyzer, up to **294 T/H/m²**
- ② One of the **broadest** CLIA test menu
- ③ Continue to use **MAGLUMI®** reagent kits with perfect compatibility
- ④ **High-tech components** with excellent performance
- ⑤ User-friendly design: support **no-pause reagents loading/unloading**. The whole process of adding reagent **only needs 5 seconds**

Top 10 Highlights of MAGLUMI® X3

- ⑥ Support **no-pause samples loading/unloading** and STAT mode
- ⑦ Intelligent washing function: **different mixing modes and washing modes depending on different assays**
- ⑧ **Bidirectional temperature control technology** in measuring chamber, to ensure the accuracy of measurement results
- ⑨ Intuitive indicator lights make no need to **check reagents and consumables frequently.**
- ⑩ Intelligent UI interface, **user-friendly, easy and convenient operation.**
