

## Letter of product Confirmation

|                         |                     |
|-------------------------|---------------------|
| Reference NO:           | 20210617            |
| Product Classification: | Capture Units       |
| Issue Date:             | 2021.06.17          |
| Involved Product:       | iDS-TCV5(9)07-BIR/C |

By this letter „Hangzhou Hikvision Technology Co., Ltd”, a company duly organized and registered in accordance with the laws of the China, confirms that due to the continuous development of the products, new Functional and Smart Features were added to camera model iDS-TCV5(9)07-BIR.

In order to mark this new added features, „/C” was added to basic name of camera, indicated on the technical sheet of the product on our official website too (iDS-TCV5(9)07-BIR/C).

The most important new added characteristics are presented below :

Updated information regarding Speed Measurement Accuracy. As a result, confirmation of detection accuracy and small margin of error is confirmed. ( $\pm 1$  km/h till 100km/h;  $\pm 1\%$  km/h between 100-250km/h).

Software functionality improved by our developers, regarding Smart Features of camera : Recognition, Coverage, Trigger Mode, Smart Function.

Update of analytical algorithms for creating database groups by license plate types, Vehicle type classification, color identification, no-plate vehicle capture, vehicle driving, direction detection.

Interoperability with external databases that allow exchange of data on registration numbers from non-manufacturer HIKVISION platforms and devices.

Through algorithm optimization and hardware chip update, we have increased the number of lanes covered by the device’s radar, and smart feature coverage. iDS-TCV907-BIR/C supports four-lane speed measurement through radar; in addition, the camera’s smart feature coverage has been increased to four lanes.

Enhanced Linux-based integrated operating system in the device that allows to use optional GPS module or 3/4G module for the following functions: GPS for time synchronization with satellites, 3G 4G modem for additional connection; TF memory card for archive or data collection.

Model EXPERT-FS and model iDS-TCV5(9)07-BIR/C are the same.
