CYNOTECHNIC NUTRITIONAL PLUSSES	KEY NUTRIENT	ACHIEVED BENEFITS
 Harmonic Growth Rates	Proteins - Lipids BALANCED	The balanced supply of proteins and fats optimizes the nutrition of these morpho-breeds, without exceeding with the calorie intake, favoring a harmonious development and avoiding the accumulation of body fat.
 Immune Development	Vitamin E ADDED	The right integration supports the correct immune system development in puppies.
 Intestinal Safety	Ingredients SELECTED	The specific formulation of the food does not include wheat, in order to protect the intestinal integrity in gliadin sensitive puppies of these breeds. Chicken and rice are extremely digestible, too.
 Optimal Olfaction	Chicken fats SELECTED	The sense of smell is improved by the prevalence of unsaturated fatty acids supplied by the chicken fat, which exalts the performance of olfactory receptors in dogs.

COMPOSITION

Croquettes with chicken and rice
Complete food for puppies
Processed animal protein (of which dehydrated chicken proteins 10%), maize, husked rice (15%), maize middlings, chicken fat (11,5%), dried beet pulp, hydrolysed animal proteins.
