## **Hemodialysis Catheter Kits**

Insert, comfort, maintain. Ares Hemodialysis Catheters offers you ease for each of these steps. Inserting the catheter, providing a safe venous introduction, comforting the patient and maintaining the access. Having a mindful design and innovative structure, Ares Hemodialysis Catheters assure optimal patient care. Fueled with a strong commitment, Ares delivers excellent products that will help to improve patient outcomes worldwide.

#### Excellenty Soft Symmetric Tip

Optimally soft atraumatic and symmetric tip and laser-cut side slots minimizes recirculation and the the risk of positional occlusion, reduces clot formation and decreases debris attachment.

#### Complete Kit for Complete Procedure

Ares Hemodialysis Catheter Kit, is offered to the market as a complete set for the hemodialysis procedure. The kit includes hemodialysis catheter, puncture needle, guidewire, sheath, dilator, scalpel, syringe and compress pad.

#### Perfection in One Kit

The catheter lumens are designed with the required largeness to complete the whole circuit for the removal of the patient's blood during the treatment. The tip of catheters is specifically soft for atraumatic insertion with perfect anti-kink performance and flexibility. Thin walls of the catheter allows for smooth transition of fluids. The catheters are semi-rigid at the room temperature while its thermosensitive material allows the catheter go softer when it inserted into the patient's bloodline and reach body temperatures. Radiopaque tip of the catheter assures perfect visualization under X-ray. Non-thrombogenic surface of the catheter minimizes the risk for thrombosis during the procedure and usage of the device.

## Why Ares Hemodialysis Catheters?

Thermosensitive Polyurethane Material – Softens after insertion for improved patient comfort.

Silicone Extensions - Provide better flexibility and avoid memory from clamping without sacrifi cing comfort.

**Straight or Curved Construction** – Ares catheters are available with straight and pre-curved catheter and extension design options.
