

Spectrum Allocation Commitment Declaration

MTender ID: ocds-b3wdp1-MD-1781161220358

Title of contract: Hybrid Private 5G Network Extension (local UPF)

Name of Project: "Cross-Border Interconnected Mobile Networks for Education and Innovation" (CONNECTINNO), EMS-ENI code: ROMD00495

Orange Moldova SA guarantees the allocation of 20 MHz of spectrum within the frequency block of 3660-3760 MHz for the UTM hybrid private 5G network extension, necessary to achieve, with guaranteed quality of service, the performance and sizing requirements set out in section 3.3.4.2 Performance Requirements of the Task Book. Orange Moldova SA reserves the right to use the relevant spectrum for its own commercial purposes outside the laboratory room, provided that such use:

- does not cause harmful interference within the UTM private 5G network coverage area;
- does not impair the performance, availability, quality of service, or continuity of the UTM private 5G network.

The access to the hybrid private 5G network extension will be implemented over a dedicated network slice, configured as per the 3GPP release 16 standard S-NSSAI values (SST and SD).

Orange Moldova SA confirms the possibility of extending the bandwidth from the initial 20 MHz up to 100 MHz during the contract period, subject to applicable regulatory approvals, spectrum availability, and operational feasibility.

Regards,

Dana Argint

Corporate Sales and ICT Solutions Director

I.M. „Orange Moldova” S.A.
