SHURE HEADSETS - Broadcast

Designed to meet the needs of broadcast and media production professionals, the BRH440M and BRH441M dual and single-sided headsets provide 'exceptional' audio quality, comfort and durability. Cables ear-pads and microphone windscreens are replaceable.

The closed-back, circumaural design of the headphones provides 'excellent' isolation from background noise; dynamic microphones with a cardioid polar pattern and frequency response optimised for communication in loud environments 'deliver natural, highly intelligible vocal reproduction'. The lightweight designs have adjustable, padded headbands for comfort; a flexible microphone boom pivots 270 degrees for use on the left or right side of the head. The microphone is muted when raised vertically away from the mouth. The cable is single-sided and detachable.

Microphone response: 50Hz - 15kHz. Impedance: 200 ohms. Sensitivity: -67dBV/Pa, 1kHz, open circuit.  
Headphones: Dynamic, neodymium magnet, 40mm. Response: 15Hz - 27kHz. Impedance: 300 ohms. Sensitivity: 101 dB/mW, 1kHz. Maximum input: 1000 mW.

BRH440M Broadcast Headset - Dual sided

This is a two-ear headset for 'TV, broadcasting and live events'. Based on the Shure SRH440 studio headphone it has a collapsible design for ease of transportation. Weight: 341g without cable.

Included accessories: Earpads, windscreen for microphone boom.  
Optional accessories: Cables; the BCASCA-XLR3QI cable is terminated with a 3-pin male XLR connector for the microphone and a 6.35mm stereo jack plug for the headphone/headphone. When used with a single-sided headset, the earphone is connected to the tip of the jack plug. The BCASCA-XLR4 cable is terminated with a 4-pin XLR; pin four feeds both ears. The BCASCA-XLR5 cable has a 5-pin male XLR; pins 4 and 5 feed the two ears separately.

BRH441M Broadcast Headset - Single-sided

This version has only a single earpiece, otherwise it is similar to the BRH440M, except the following. Weight: 240g, without cable. Accessories are as the BRH440M.

Replacement parts

Cable assemblies, ear pads and microphone windshield, to fit both the BRH440M and the BRH441M headsets, are listed. The SHURE BCATP1 temple pad fits the BRH441M, on the opposite side to the single earpiece.
