Basic description

Procedure Pack with SX-ELLA Stent Danis

Self-expandable nitinol stent preloaded in a ready-to-use delivery system. Complete procedure pack including all items required for implantation.

Indications

SX-ELLA Stent Danis is intended to stop acute and/or refractory bleeding from esophageal varices.

Contraindications

- ✓ Diagnosed malignancy or stricture affecting the esophagus
- ✓ Case history of irradiation therapy of the chest or the esophagus
- ✓ Malignancy of the throat or larynx
- ✓ Malignancy of bronchus or fistula
- ✓ Stomach malignancy
- ✓ Suspicion of bleeding due to foreign body injuring the upper gastrointestinal tract

Features / Benefits

- ✓ Variable stent braiding is adjusted to esophageal peristalsis - reduced migration rates.
- ✓ Standardized compression of the varices results in effective hemostasis.
- ✓ Atraumatic stent ends.
- ✓ Radiopaque markers at both stent ends and at the midpoint - for possible X-ray control of the stent position.
- ✓ Retrieval loops made of medical grade alloy at both stent ends - high mechanical durability and acid resistance.
- ✓ Easy endoscopic stent removal within 7 days.

Benefits of the method

- ✓ Readily implantable without endoscopy / X-Ray control, also in emergency situations.
- ✓ Patient can continue an oral diet after stent implantation.

Additional description

Danis Procedure Pack (019-08S-25-135) consists of a plastic carry case containing all items required for stent implantation:

- ✓ Delivery system preloaded with stent, guide wire, plastic syringes, mouthpiece, kidney dish, slobber cloth, waste bag with clip, gloves.

Danis Procedure Pack Basic (019-08S-25-135-B) consists of:

- ✓ Delivery system preloaded with stent, guide wire, plastic syringe 50 ml.

The delivery system 9.4 mm (28 F) / 6.6 mm (20 F) is available in a standard length of 60 cm.
