**Confirmation of actuality and validity of
EU Type Examination certificate 2301119-02-86**

Dear Mr. Fischer,

We confirm that our EU Type Examination Certificate
2301119-02-86 with annex **2301119-02-86-01** was issued against the actual valid harmonised standard
EN 1509:2012.

The actual list of harmonised standards you will find at the following page of EU Commission:

<https://ec.europa.eu/docsroom/documents/54755>

About a standard version we have no information

We do not have any information about an EN 15090:2014 2014 version, although we are actively
involved in the corresponding European standardisation committees, even as chairmen.

Perhaps national standards XXX EN 15090 can be issued with different publication date. Our
German version DIN EN 15090 have also publication date 2012, but in other German Standards
there are differences between DIN EN and EN version.

I hope this helps you.

Don't hesitate to contact us if you have any further question.

Best regards

Dr. Markus Scherer
