## Manufacturer's Statement

Reference: Delivery timeframe for CONG Prima-10

To whom it may concern,

Delivery of the CONG Prima-10 interferometric dew point analyzer has unfortunately been impacted by the Covid-19 pandemic. Reductions in production capacity and delays in the supply of component parts have resulted in unprecedented delays.

Currently, CONG Prima-10 analyzers ordered in 2021 are still being delivered. This will continue into the second quarter. Orders placed in 2022 will only be ready for delivery later in the year with current lead time up to 6 months.

We regret any inconvenience that this may cause.

Sincerely,

  
Paul Lyon  
Sales and Marketing Manager  
Vympel GmbH
