(15.000 lt. Capacity)

Clean Room  
(Compliance with Class 100.000 Standard)

## Mission;

To meet the customer demand and expectations at the highest level by continuously improving the product and service quality

To be among the innovative, internationally accepted brands that create value for human health

To make customer satisfaction, belonging and loyalty sustainable

To produce the "first" and the "best" ones in the field of disposable medical textile products by developing new products

To provide product support to its customers during sales and after-sales process

## Vision;

Our vision is to make **Medicotex** a world brand by offering the same quality service to all its customers without compromising its health and hygiene policy

by regards human resource as the most valuable asset

by creating its own brand

by increasing its service quality in its field as a reliable and reputable company

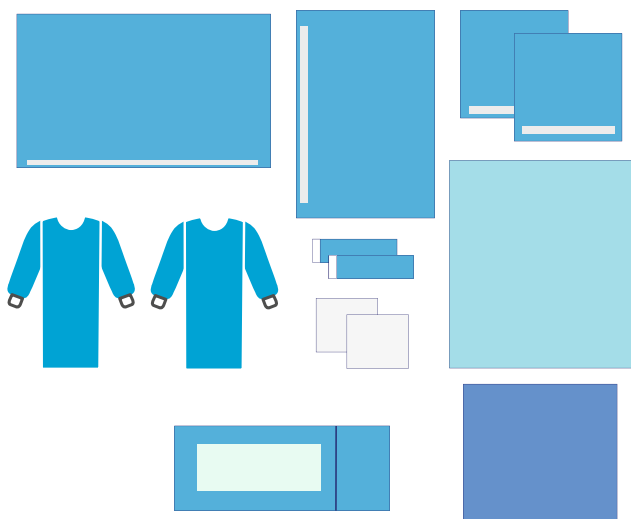

by presenting hygienic products to the users

## Birth of Our Brand

Our Company, which has started out with the aim of creating a world brand, has created **Medicotex** brand by inspiring from the names of two main sectors in which it is active as a result of the permanent identification studies in this long run.

With a simple name preference, our company wishes to emphasize with a simple expression that it would be a long-running actor and has a full command of the essence of work in the Disposable Surgical Products Field.

At this point, we see that **Medicotex** brand has a voice and also become a determinant brand.

The followings are produced together with **Medicotex**

Disposable Drape Sets  
Specific to all Surgical Operations  
Sterile & Non-Sterile

Disposable Gowns  
Specific to all Surgical Operation Team  
Sterile & Non-Sterile

Disposable Laboratory Gowns

Disposable Clothes and Gowns

Disposable Work-Clothing

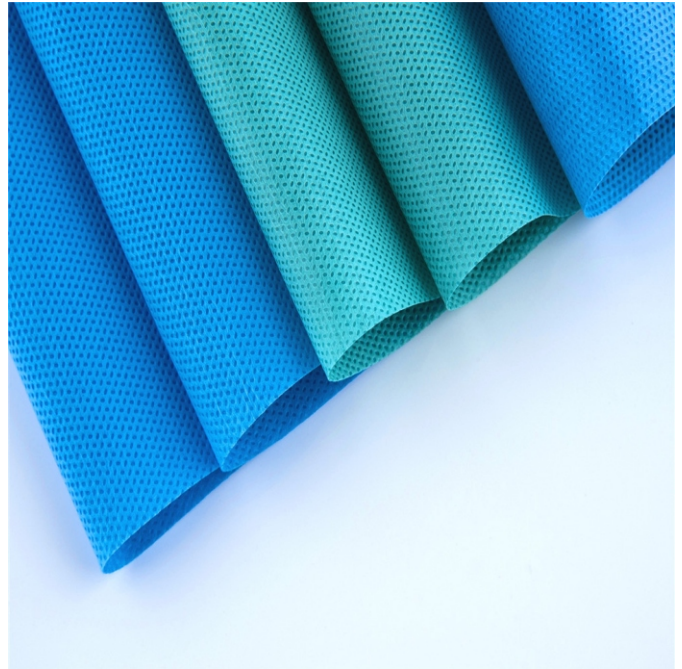

Disposable Overalls

Disposable Covers for Medical Devices

Human Remains Pouches

## Why disposable;

The general objective of the drapes used in the surgical operations is to serve as a barrier against bacteria being a factor in the development of surgical site infections. In this way; the sterile site can maintain its sustainability because the material used is disposable and also minimize the infection risk. Its feature being specific to the operations and person increases extraordinarily the sustainability of the sterile site.

## A Quality Drape;

It should be in accordance with the operating room environment and operation dynamics.

It should maintain the pre-set body temperature.

It should have an acceptable resistance to mechanical electrification and ignition.

It should be resistant to wear, to tear and the most importantly to puncture.

It should be resistant to bacterial permeability.

It should be sterilized and also should sustain this status.

It should be antitoxic.

It should be anti-pilling and also should not release dust

It should be fine-porous and ticking in terms of weaving structure.
