Reusable Silicone Laryngeal Mask

This airway management product is the non-surgical and invasive device used for human body cavity in the short time, which is not in association with active medical devices. It can establish an artificial airway when the cuff of laryngeal mask tight covers the throat during the anesthesia and emergency treatment. It is also useful in situations where manipulation of the head or neck to facilitate endotracheal intubation is difficult or unsuccessful.

Features:

1. Made of medical-grade silicone, transparent tube, high quality
2. Yellow cuff, without aperture bar
3. Autoclaved at 134°C, polysulfone connector, reusable up to 40 times with record card
3. Sterile, EO
4. Individually packaged
5. CE, ISO Certified

Size	Product Code	Maximum Cuff Inflation Volumes (ml)	Patient Weight (KG)
1	LM2S10-Y	4	0-5
