

# 3-LUMEN PAPILOTOME

## FOR PRECISE WIRE GUIDANCE AND CANNULATION

Positioning, cannulation and resection are the decisive features of a safe and successful papillotomy. The 3-lumen papillotome from MICRO-TECH meets these requirements in every way: Emerging from the working channel in the correct position, the atraumatic tip, tapered to 5 Fr, supports cannulation and the resection is done reliably at the "11 o'clock" marker. Maximum safety during resection

is also provided by optional proximal insulation of the cutting wire. The three lumens for cutting wire, guide wire and contrast media provide for a high level of safety and efficient contrast injection. Thanks to the ergonomic 3-ring grip handle, this papillotome is highly user-friendly and easy to control.
