Specification Statement

Subject: Clarification Regarding Self-Test Functionality on ZEUS-400

Ref.No. ZOCS250307-C02

To Whom It May Concern

This letter serves to provide clarification regarding the self-test functionality of our ZEUS-400. We understand there may be questions concerning the absence of a visual "Self Test" display upon device boot-up.

Please be advised that the ZEUS-400 is equipped with a 7-segment display on its front panel. Due to the inherent limitations of this display type, it is not designed to visually represent the phrase "Self Test."

However, we wish to assure you that the self-test function is fully operational and executes internally each time the device is powered on. This internal process rigorously assesses the device's critical components and ensures its proper functionality.

We are committed to providing reliable and high-quality products. The absence of a direct "Self Test" display in no way compromises the integrity or effectiveness of this essential diagnostic feature.
