Rev. 1

Focused on Future

AKtive®
Ophthalmic Instruments

AKtive® is a medical device manufacturing company located in Rome, Italy. **AKtive®** has been in the distribution business since 2007; by incorporating the company Meditekno in 2011, **AKtive®** achieved over 30 years of experience in manufacturing microsurgical instruments for posterior and anterior procedures. Starting from 2012, all the interests have been focused on developing a new line of disposable and semi-disposable instruments.

AKtive® produces the finest instruments using modern machining methods with hand finishing by highly skilled instrument makers. Our rigorous quality assurance system meets the requirements for many international controls including ISO 13485:2016 and CE marking, ensuring a consistent production line.

Without losing its artisan origins, **AKtive®** leaves open the possibility of manufacturing prototypes from ideas which are geared towards specific surgical requirements.

Our Mission

We

would like to provide the highest quality products at a very competitive cost through the use of innovative solutions.

*needs adapter

First letter of the code represents the type of connector for the aspiration. Following letters (1 or 2) represent the pressure line connectors. If there is the number 2 it means it is a dual cut

To choose the most suitable Vit cutter for your equipment you need to know:

- PSI of the instrument.
- The maximum cutting speed (CPM)**.
- The gauge (20-23-25-27g).
- Single cut or dual cut blade.

If you do not know the operating pressure of your equipment (expressed in psi) refer to the table you see above, which shows the values of the most popular equipments. Once you know your reference PSI, go to the table of AKTIVE vit cutters and position yourself on the PSI corresponding to your value. You may find for the same PSI value different suggestions. Choose in the row that is closest in CPM value. Now that you have located the model that comes closer for PSI and CPM you can decide on the gauge and whether the blade should be single cut or dual cut. The code will show 2 or 3 letters. The first indicates the type of connector for the aspiration, while the second or third letter represents the type of connector for the pneumatic drive operated by the instrument. Check for correspondence with the list of connectors below. It is important for the user to be aware that AKTive is a vit cutter manufacturer. Many users use AKTive vit cutters with connections to their own equipment. Connection to any of these instruments is the responsibility of the user and in no way constitutes a statement of compatibility

Contact us to help your choice.

** The CPM is given by the manufacturer of the instrument. It represents the maximum impulses the instrument can give to the cutter. Some manufacturers of equipment find easy to say that the machine is 16.000 CPM (in dual cut); the effective impulses are 8.000, applied to a blade that makes the effect double.

Guide

To choose the best fiber for your instrument, you need to know the type of connector your instrument has. Below is a table representing the most popular equipments on the market. Each has been assigned a letter. Identify which type of attachment best suits your instrument.

It now remains to decide what type of illumination you need: standard, wide angle or shielded. Finally the gauge, choose between 20-23-25-27.

At the end of each code you will find a letter. Choose the one that corresponds to your instrument.

You are now ready to determine exactly your fiber.

It is important for the user to know that AKtive is a fiber optic manufacturer. Many users use fiber optics from AKtive with connections to their own equipment. Connection to any of these instruments is the responsibility of the user and in no way constitutes a statement of compatibility.

Reusable & Disposable Phaco Needles

(All tips are available in disposable packages too.)

Type A

Total Length 30mm - Square Key - straight

Type C

Total Length 22mm - Square Key - straight

Type E

Total Length 30mm - Square Key - Curved 22°

Type G

Total Length 22mm - Star Key - Curved 22°

Type B

Total Length 22mm - Star Key - straight

Type D

Total Length 30mm - Square Key - Curved 10°

Type F

Total Length 26mm - Square Key - straight

Type T

Total Length 22mm - Square Key - flared

Type K

Total Length 22mm - Star Key - flared

Phaco Needle, 19g American Thread

AK-1701A/B/C/T/K	Phaco Needle, 19g, 0° - 1 per box
AK-1702A/B/C/T/K	Phaco Needle, 19g, 15° - 1 per box
AK-1703A/B/C/T/K	Phaco Needle, 19g, 30° - 1 per box
AK-1704A/B/C/T/K	Phaco Needle, 19g, 45° - 1 per box
Use Recommended for A = Alcon, B = AMO, C = B&L	

Phaco Needle, 21g American Thread

AK-1725A/B/C/T/K	Phaco Needle, 21g, 0°, straight
AK-1726A/B/C/T/K	Phaco Needle, 21g, 15°, straight
AK-1727A/B/C/T/K	Phaco Needle, 21g, 30°, straight
AK-1728 G	Phaco Needle, 21g, 15°, Curved 22°
AK-1729 G	Phaco Needle, 21g, 30°, Curved 22°
AK-1720D/E	Phaco Needle, 21g, 30°, Curved 10° or 22°
AK-1730/G	Phaco Needle, 21g, 30°, Curved 10° reverse
AK-1721D/E	Phaco Needle, 21g, 45°, Curved 10° or 22°

Use Recommended for: A = ALCON, B and G = AMO, C = B&L, D and E = Alcon Torsional

Phaco Needle, 22g American Thread

AK-1722 A/B/C/T/K	Phaco Needle, 22g, 0°, straight
AK-1723 A/B/C/T/K	Phaco Needle, 22g, 15°, straight
AK-1724 A/B/C/T/K	Phaco Needle, 22g, 30°, straight
AK-1712/G	Phaco Needle, 22g, 15°, Curved 22°
AK-1713/G	Phaco Needle, 22g, 30°, Curved 22°
AK-1739/D	Phaco Needle, 22g, 30°, Curved 10°
AK-1714/G	Phaco Needle, 22g, 30°, Curved 10° reverse
AK-1739/E	Phaco Needle, 22g, 45°, Curved 22°

Phaco Needle, 20g American Thread

AK-1715A/B/C/T/K	Phaco Needle, 20g, 0°, straight
AK-1716 A/B/C/T/K	Phaco Needle, 20g, 15°, straight
AK-1717 A/B/C/T/K	Phaco Needle, 20g, 30°, straight
AK-1718 G	Phaco Needle, 20g, 15°, Curved 22°
AK-1719 G	Phaco Needle, 20g, 30°, Curved 22°
AK-1710D/E	Phaco Needle, 20g, 30°, Curved 10° or 22°
AK-1720/G	Phaco Needle, 20g, 30°, Curved 10° reverse
AK-1711D/E	Phaco Needle, 20g, 45°, Curved 10° or 22°
Use Recommended for A = ALCON, B and G = AMO, C = B&L, D and E = Alcon Torsional	

Phaco Needle, Metric Thread

	Angle 0°	Angle 15°	Angle 30°
19g	AK-1730F	AK-1733F	AK-1736F
20g	AK-1731F	AK-1734F	AK-1737F
21g	AK-1732F	AK-1735F	AK-1738F
Use Recommended for OPTIKON			

All needles available in disposable & reusable models

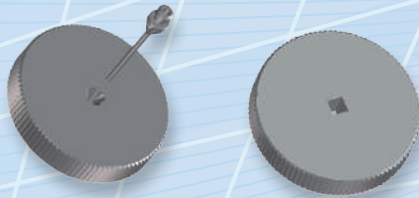

disposable blister composition:	reusable blister composition:
- needle - sleeve - test chamber - wrench Models A and F have no sleeve	- needle Protection can be used as wrench at first use but can not be sterilized

Phaco Accessories

AK-1746	Irrigation Sleeve, 20g reusable American Thread
AK-1747	Irrigation Sleeve, 21g reusable American Thread
AK-1746.1	Irrigation Sleeve, 22g reusable American Thread

AK-1743	Reusable Wrench Star non-sterile
AK-1744	Reusable Wrench square type non-sterile

Spears

PVA Eye Spears

A-0405	• Lint-free PVA material • Compressed spears are ideal for controlling and absorbing fluid in and around the orbital area during cataract or refractive procedure • 180 pcs box (18 blisters of 10 pcs each)
--------	--

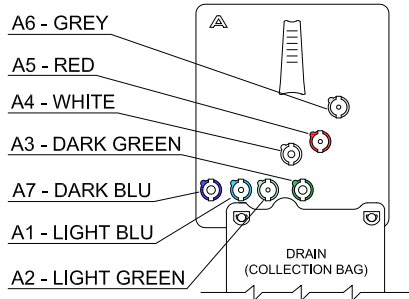

Irrigation/Aspiration Disposable Bi-Manual Handpieces

AK-0439	Set bi-manual I/A handpieces 21g -20 per box Irrigation double port 0.40mm - aspiration single port 0.35mm - disposable
---------	---

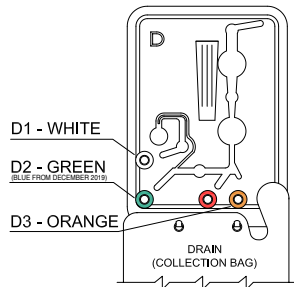

By-pass Connectors

Type A

AK-0340/1	Connector A1, reusable (light blue)

6562A	Base, Lid & Mat	16,5 x 45,7 x 7,6 cm

Manipoli per tip retiniche - *Retina tip Handpiece*

The Handpieces are reusable and have interchangeable disposable and reusable tips. Different tip colors help identify the instrument with ease.

This system allows the surgeon to change only the tips after a 23-25g surgery.

AK-1642GR (green) Manipolo per tip retiniche, doppia leva

Retina Handpiece, double lever

Squeeze Handle:

- High Constructive Technology
- Color Coded
- High Performance

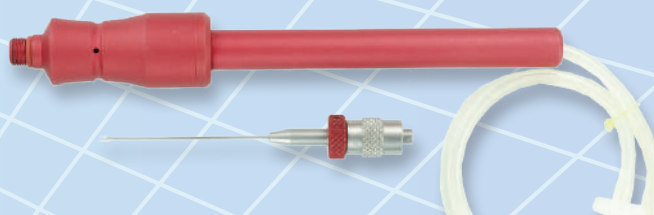

AK-1642BL (blue) Manipolo per tip retiniche, doppia leva

Retina Handpiece, double lever
