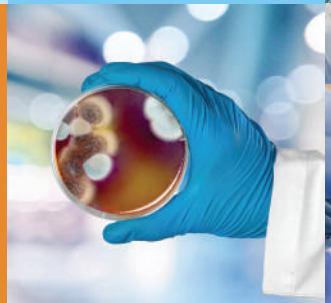
Comprehensive solutions for healthcare providers



WWW.ZARYS.COM

since 1989...

ZARYS. Best solutions based on experience.

WWW.ZARYS.COM

ZARYS International Group is a company with 32-year experience in the medical device industry. Since the foundation in 1989 ZARYS has surmounted a variety of business, trading and economic upheavals in becoming the market leader in healthcare distribution in Poland and abroad.

ZARYS offers a wide range of products including dressings, surgical drapes, examination gloves, disposable medical devices for urology, gynecology, oxygen therapy and many other items. The company is still extending its product list in order to meet new market needs.

What distinguishes ZARYS from the competitors is strong ethics and continuous search for new solutions. In order to meet our clients' expectations we are constantly reviewing our product range. All of our devices are selected very carefully with great attention paid to current needs, quality convenient availability. The company has the pleasure to cooperate with highly qualified health care specialists, who share with us their expertise and understanding of the latest trends in clinical practice.

We offer products under our own brand and distribute the world's top manufacturers' medical devices. Our team believe that maintaining fair and reliable relationships with our international partners is the key to turn a business opportunity into a majorsuccess story, therefore we regularly visit our customers and suppliers in their own countries and handle challenges together.

Our values, strategies and comprehensiveness guarantee successful and satisfactory cooperation.

MEDICAL GLOVES pp.8-17

EXAMINATION GLOVES

nitrile examination gloves

11 | **mediCARE** nitrile lime green
11 | **mediCARE** nitrile pink
12 | **mediCARE** nitrile AMG
13 | **mediCARE** nitrile Hydra+
14 | **easyCARE** nitrile black
14 | **easyCARE** nitrile pink
15 | **easyCARE** nitrile

latex examination gloves

16 | **easyCARE** latex
16 | **easyCARE** latex PF

vinyl examination gloves

17 | **easyCARE** vinyl
17 | **easyCARE** vinyl PF

BASIC MEDICAL DEVICES pp.18-71

BASIC DISPOSABLE EQUIPMENT

21 | **dispoFINE** injection needle
21 | **dispoGUARD** safety injection needle
23 | **duoNEX** single-use syringe, 2-part, luer
23 | **dicoNEX SN** single-use syringe, 3-part, luer, with needle alongside the syringe **NEW!**
24 | **dicoNEX** single-use syringe, 3-part, luer
24 | **dicoNEX** single-use syringe, 3-part, luer lock
25 | **dicoNEX** single-use catheter syringe, 3-part
25 | **dicoNEX** single-use catheter syringe, 3-part
26 | **dicoTUBER** tuberculin syringe
26 | **dicoSULIN** insulin syringe
27 | **safeLANCE** pressure-activated safety lancet
27 | **dispoSULIN** insulin pen needle
28 | stomach tube/duodenal tube
29 | feeding tube graduated, with X-ray contrast **NEW!**
29 | suction catheter
30 | suction catheter with vacuum control
30 | suction catheter with frozen surface, phthalate-free
31 | vaginal speculum cusco type
31 | **dicoSPIKE** withdrawal cannula **NEW!**
32 | cervical brush standard
32 | cervical brush special
32 | umbilical cord clamp

INFUSION THERAPY

34 | **SANVIflon safe** safety I.V. cannula **NEW!**
34 | **SANVIflon premium** I.V. cannula **NEW!**
35 | **SANVIflon** I.V. cannula **NEW!**
35 | **SANVIflon S** I.V. cannula without port **NEW!**
36 | **easyFLOW IS** infusion set
36 | **easyFLOW IS ECO** infusion set **NEW!**
37 | **easyFLOW LINE** extension tube for infusion pump
37 | **easyFLOW TS** transfusion set
38 | 3-way stopcock
38 | 3-way stopcock with extension tube
39 | needle-free valve
39 | cannula stopper

UROLOGICAL CATHETERS AND URINE BAGS

41 | foley catheter 2-way, silicone-coated latex
42 | foley catheter 3-way, silicone-coated latex
42 | foley catheter 2-way, 100% silicone
43 | foley catheter 3-way, 100% silicone
43 | foley catheter 2-way with tiemann tip, silicone-coated latex
44 | pezzer catheter, silicone-coated latex
44 | nelaton catheter
45 | tiemann catheter
45 | urine bag
46 | urine bag with sample port
46 | urine bag with sample port 2W
47 | samples taking urine bag
47 | urine bag hanger
47 | enema bag, sterile
48 | enema bag, non-sterile
48 | enema set, non-sterile
48 | vomit bag. non-sterile **NEW!**

OXYGEN THERAPY

50 | oxygen mask with tubing
50 | non-rebreather mask with tubing
51 | nebulizer mask with tubing
51 | multi-vent mask with tubing
52 | nasal oxygen cannula
52 | oxygen tubing
53 | nebulizer with mouthpiece and tubing
53 | nebulizer with T adaptor, mouthpiece, corrugated tube and tubing

ANAESTHESIA PRODUCTS

55 | laryngeal mask PVC
55 | laryngeal mask silicone
56 | intubation stylet
56 | tracheal tube introducer curved **NEW!**
56 | endotracheal tube uncuffed
57 | endotracheal tube cuffed
57 | reinforced endotracheal tube cuffed
58 | endotracheal tube holder
58 | tracheostomy tube cuffed
59 | dual-limb breathing circuit
59 | catheter mount with double swivel elbow connector **NEW!**
60 | oropharyngeal airway/guedel airway
60 | air cushion anaesthetic mask

GENERAL SURGERY

62 | Yankauer surgical suction cannula, standard
62 | Yankauer surgical suction cannula, bulb tip
63 | surgical suction tube
64 | surgical suction set, with Yankauer cannula, standard
65 | surgical suction set, with Yankauer cannula, bulb tip
65 | T-KEHR drain, 100% silicone

OTHER DISPOSABLE PRODUCTS

67 | latex-free tourniquet
67 | automatic tourniquet
68 | dental brush with suction
68 | oral swab
68 | tonque depressor
69 | wash glove MOLTON
69 | wash glove SPUNLACE
69 | wash glove with film lining
70 | ID wristband
70 | entrance mat
71 | PE gloves
71 | PE apron

DRESSINGS pp.72-107

TRADITIONAL DRESSING MATERIALS

gauze and non-woven dressings

75 | **GAZA lux** dressing gauze, zig-zag folded
75 | **GAZA lux** cutting gauze
75 | **GAZA lux S** cutting gauze
76 | **KOMPRI lux** gauze swabs **BESTSELLER!**
77 | **KOMPRI lux S** gauze swabs
78 | **SERVI lux** gauze lap sponges
78 | **SERVI lux S** gauze lap sponges
79 | **TUPFER lux** gauze balls
79 | **TUPFER lux S** gauze balls **NEW!**
80 | **NONVI lux** non-woven swabs
80 | **NONVI lux S** non-woven swabs
80 | **NONVI lux S** non-woven swabs, with Y-incision
81 | **MULTIabsorb** ABD pads, multi-layer
81 | **MULTIabsorb S** ABD pads, multi-layer
82 | **elastoLUMENAL** eye pads
82 | **elastoLUMENAL S** eye pads

ADHESIVE TAPES AND PLASTERS WITH DRESSING

adhesive tapes

84 | **SENSIplast** adhesive fabric tape, white
84 | **PLASTIplast** adhesive fabric tape, skin colour
85 | **SOFTplast** adhesive non-woven tape
85 | **SILKplast** adhesive silk tape
86 | **FILMplast** adhesive PE tape
86 | **POREplast** adhesive perforated non-woven tape

plasters with dressing

87 | **NONVIplast** non-woven plaster with dressing
87 | **FABRIplast** fabric plaster with dressing

SPECIAL PURPOSE DRESSINGS

self-adhesive non-woven dressings

89 | **elastopor, elastopor E** adhesive non-woven dressing tape
90 | **elastopor STERIL** non-woven dressing with absorbent pad **BESTSELLER!**
90 | **elastopor IV** non-woven IV cannula dressing **BESTSELLER!**
91 | **elastopor STERIL D** non-woven dressing with absorbent pad, incision and O-hole
91 | **elastopor EYE** non-woven eye dressing with absorbent pad
92 | **elastoKIDS IV** non-woven IV cannula dressing **NEW!**
92 | **elastoKIDS STERIL** non-woven dressing with absorbent pad **NEW!**

stabilizing tapes

93 | **elastoNASAL** non-woven nasal cannula fixation plaster
93 | **elastoFIXAL** adhesive tape for catheter tubing fixation
94 | **elastoFIXAL Set** adhesive tape for endotracheal tube **NEW!**

STABILIZING DRESSINGS

fixation of dressings

96 | **elastoBAND BASIC** knitted supporting bandage
96 | **elastoBAND FLEX** elastic supporting bandage, woven
97 | **elastoNET** elastic tubular net bandage

immobilizing dressings

98 | **orthoNATURAL** orthopedic padding, natural
98 | **orthoSYNTHETIC** orthopedic padding, synthetic
99 | **elastoSLING** triangular sling
100 | **orthoBAND FAST, orthoBAND NORMAL, orthoBAND LONG** P.O.P. bandages

SPECIALIST DRESSINGS

103 | **paraffiNET** paraffin gauze dressing

foil dressings

104 | **elastoDERM** foil dressing
104 | **elastoDERM F** foil dressing with frame
105 | **elastoDERM F-IV** IV cannula dressing with frame
105 | **elastoDERM IV** IV cannula dressing
105 | **elastoDERM PAD** foil dressing with absorbent pad

ADDITIONAL PRODUCTS

107 | **alkoCLEAN** gauze pad moistened with alcohol
107 | **thermCARE** rescue blanket, foil, termic

MEDICAL CLOTHING pp.108-131

MEDICAL GOWNS

111 | medical gown with elastic cuffs, non-woven
111 | medical gown with knitted cuffs, non-woven

SURGICAL CLOTHING

113 | surgical suit, short-sleeved shirt+trousers, non-woven
114 | surgical shirt, short-sleeved, non-woven
114 | surgical shirt, long-sleeved, non-woven
115 | surgical trousers, with ties, non-woven

CAPS AND PROTECTIVE MASKS

117 | medical bouffant cap, non-woven
117 | **DONA** medical bouffant cap
117 | **LILI** medical cap with rubber
118 | **POLA** medical cap with rubber
118 | **SOL** medical cap with ties
118 | **ABI** medical cap with ties
119 | **NINO** medical cap
119 | **KOKO long** medical cap with snood
119 | **DORA long** medical cap with snood
120 | **BEN** medical cap with ties
120 | **TOM** medical cap with ties
120 | **ROS** medical cap with ties
121 | medical mask with earloops
121 | medical mask with ties
121 | medical mask with earloops **NEW!**

PATIENT CLOTHING

123 | patient's gown, tied-up, non-woven
123 | patient's gown, Y-neck , non-woven
123 | patient's gown, V-neck, non-woven
124 | patient's gown, for delivery, non-woven
124 | colonoscopy boxers, SMS non-woven
124 | colonoscopy boxers, PP non-woven
125 | gynecological skirt, non-woven
125 | examination underpants, single-use
125 | examination underpants, single-use

SHOE COVERS AND SLIPPERS

127 | shoe covers
127 | shoe covers, calf-high
127 | disposable slippers

BEDCLOTHES AND ABSORBENT UNDERPADS

129 | disposable medical bed sheet
129 | disposable medical pillow case
129 | disposable medical quilt cover
130 | disposable medical bedding set
130 | disposable absorbent underpad
130 | disposable absorbent underpad for operating table
131 | disposable medical bed sheet, reinforced **NEW!**
131 | warming blanket soft **NEW!**
131 | warming blanket **NEW!**

PERSONAL PROTECTIVE EQUIPMENTS pp.132-133

BETASAFE

133 | protective coverall **SAFE +** against chemical and infective agents type 4b-5b-6b

SURGICAL SETS, DRAPES AND GOWNS pp.134-187

SURGICAL DRAPES

2-layer surgical drapes

141 | sterile surgical drapes with cellulose layer
141 | sterile surgical drapes
141 | sterile surgical drapes with adhesive edge
142 | sterile surgical drapes with adhesive edge
142 | sterile surgical drapes with central fenestration
142 | sterile surgical drapes with adhesive central fenestration
143 | sterile surgical drapes with adhesive central adjustable fenestration
143 | sterile adhesive epidural drapes
143 | sterile instrument table covers

3-layer surgical drapes

144 | sterile surgical drapes
144 | sterile surgical drapes with adhesive edge
144 | sterile surgical drapes with central fenestration
145 | sterile surgical drapes with adhesive central fenestration
145 | sterile surgical drapes with adhesive fenestration, reinforced

specialistic surgical drapes

146 | abdominal drape 1-IF
146 | abdo-perineal drape 1
146 | laparoscopy drape 3
147 | orthopaedic drape 1
147 | orthopaedic drape 2
147 | orthopaedic drape 3
147 | orthopaedic drape 4
148 | extremity drape 1
148 | extremity drape 2
148 | extremity drape 3
148 | extremity drape 4
149 | extremity drape 5
149 | gynaecology drape 1
149 | gynaecology drape 2
149 | delivery drape 1

surgical covers

150 | sterile mayo stand cover, reinforced - red **BESTSELLER!**
150 | sterile set of limb covers
150 | sterile limb covers
150 | sterile camera cabls covers - perforated, with 2 adhesive tapes **BESTSELLER!**
150 | sterile camera cable cover - unperforated, without adhesive tape
151 | sterile camera cable cover - unperforated, with an adhesive tape
151 | sterile circular banded covers for medical devices
151 | sterile rectangular banded covers for medical devices
151 | sterile c-arm cover set
151 | sterile armboard cover set

accessories

152 | sterile surgical tapes
152 | sterile adhesive pouches
152 | sterile adhesive fluid collection pouch
153 | sterile absorbent drape
153 | sterile incise film **elastoFILM**

Medical gloves

EXAMINATION GLOVES are intended for temporary use during medical examinations, diagnostic and therapeutic procedures, for handling medical contaminated material in order to reduce the risk of: transferring dangerous biological material through hands to a patient, acquisition of infections from patients by healthcare workers. Gloves are subject to the restrictive requirements of standards harmonized with the Council Directive 93/42/EEC concerning medical devices and the Regulation (EU) 2016/425 of the European Parliament and of the Council on personal protective equipment.

NITRILE GLOVES are made of synthetic acrylonitrile butadiene rubber (NBR), they are an alternative to latex gloves. They do not contain latex proteins that cause type I allergic reactions, and the content of chemical accelerators is minimized, so they are friendly to the skin. They are characterized by high mechanical strength (also for puncture), chemical and biological resistance (constitute a barrier for viruses and bacteria), flexibility, thanks to which they adjust to the hand, providing the work comfort to the user. Thin walls and textured finger surface enhance grip and guarantee excellent tactile sensitivity.

LATEX GLOVES made of natural rubber are recognized as the best barrier against blood-borne pathogens and part of hazardous chemical substances. They are also characterized by high flexibility, providing the work comfort to the user by fitting to the hand like a „second skin". Latex gloves, due to the natural raw material, are biodegradable. However, they can cause type I allergic reactions at people sensitive to proteins of natural rubber. Powdered gloves usually contain modified maize flour to facilitate glove donning. In the case of powder-free gloves, the inner surface is usually chlorinated or polymer-coated.

VINYL GLOVES made of PVC (polyvinyl chloride) are intended for low-risk procedures due to limited mechanical, chemical and biological resistance. The glove material does not cause Type I allergic reactions, only plasticizers can provoke a reaction in sensitized people - phthalates added during production to increase flexibility. ZARYS vinyl gloves are free of harmful phthalates.

Nitrile gloves with moisturizing and nourishing coating

GLICERIN
moistuirizes, improves skin appearance, smoothens and soothes irritations

VITAMIN E
natural antioxidant, vitamin of youth - fights off free radicals and prevents wrinkles, moisturizes for a long time

ALMOND OIL
regenerates, moisturizes, slows the aging process of the skin, smoothens, firms and helps removing dead cells, brighten the skin, soothens irritations and accelerates healing skin lesions, strengthens the hydro-lipid layer of the skin

DERMATOLOGY SOLUTION FOR SKIN PROBLEMS
- gloves that protect and nourish the hands at the same time, while providing long-lasting hydration

Anti-wrinkle effects proven in clinical tests*

*mediCARE Hydra+ glove presents a better anti-wrinkle effect compared to a traditional nitrile glove with visible reduction of wrinkles from the first day of use with progressive increase in improvment until the end of the tests

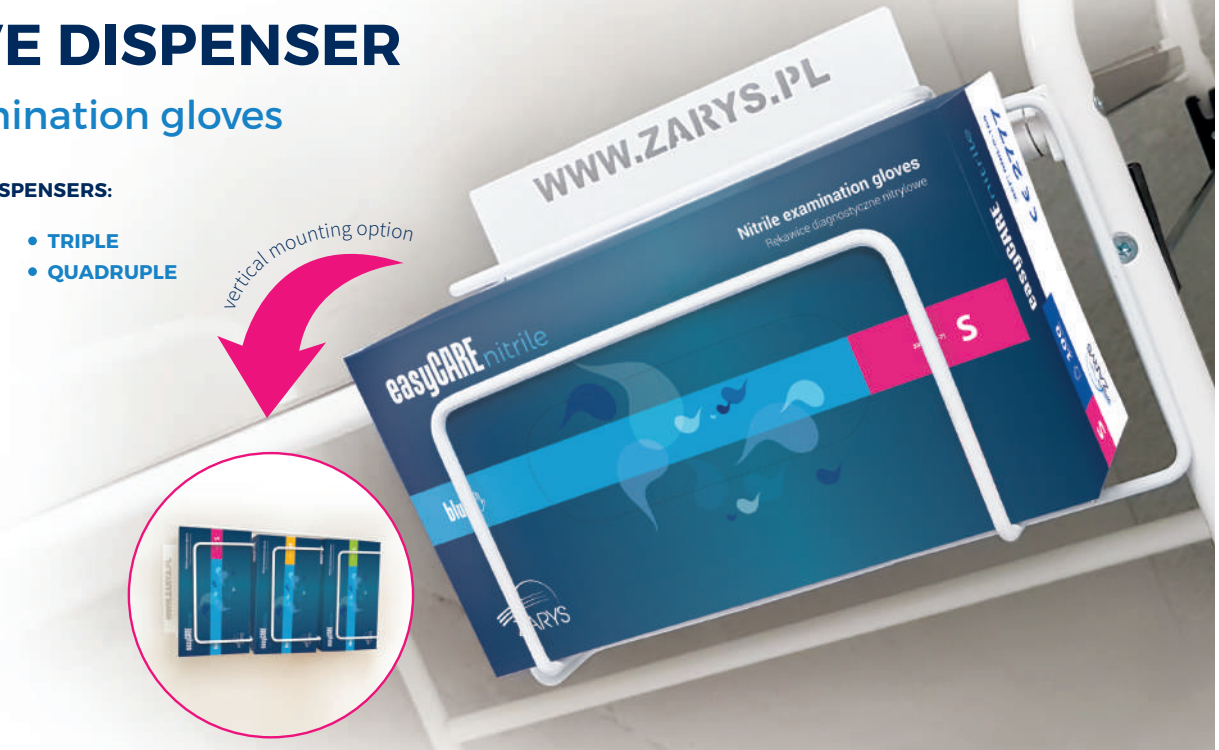
BESTSELLER

UNIVERSAL GLOVE DISPENSER

for examination gloves

TYPES OF DISPENSERS:

- SINGLE
- DOUBLE
- TRIPLE
- QUADRUPLE



advantages of the dispensers:

HYGIENE

- reduces the contamination risk of the packaging surface (no need to touch)
- coated with antibacterial paint to reduce the bacteria (Escherichia coli, MRSA) multiplication on the dispenser*

*on request

BETTER ORGANIZATION OF THE WORKPLACE

- space saving
- improvement of putting on gloves procedure

CUSTOMIZED TO INDIVIDUAL CUSTOMER NEEDS

- wall mounting on a flat surface vertically or horizontally *(equipped with a mounting kit)*
- vertically or horizontally mounted on a medical trolley, patient's bed or anaesthetic column *(assembly kit on request)*

UNIVERSALITY

- vertical or horizontal assembly
- fit to almost every glove box available on the medical market

Basic medical devices

ZARYS International Group prides itself with a long lasting experience gained in the medical industry being a leading manufacturer and supplier of single use medical devices.

A wide range of products and complex solutions make it possible to successfully respond to our customers' needs and meet their expectations.

High standards of design, production, storing and transportation allow to maintain quality, safety and comfort of use to both the medical personnel and patients.

A wide range of single use products include basic medical devices and those dedicated to specialized procedures.

ZARYS branded products find a wide application in anesthesiology, urology, gynecology, oxygen and fluid therapy and others. They make it possible to perform medical procedures including patient diagnostics, prophylaxis, treatment and care.

dispoFINE
injection needle, sterile

features

- needle tube is made of smooth and durable stainless steel
- sheath and hub made of polypropylene
- thin walls assure adequate stream pace
- tip sharpened in three surfaces (back cut)
- bevel type: LB/BL standard long bevel
- surface of needle tube covered with sliding agent (silicone)
- glued needle elements to prevent their separation (glue - epoxy resin)
- hubs coloured in accordance with ISO code allowing fast recognition of needle size
- latex-free, phthalate-free
- non-toxic, non-pyrogenic
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device designed for intravenous, intramuscular and hypodermic injections

dispoGUARD
safety injection needle, sterile

features

- safety cover can be activated with one hand and it shields needle immediately after injection
- cover integrated with needle
- tip sharpened in three surfaces (back cut)
- colour coding system for size, marked on hub
- activation of safety mechanism signalized by audible click
- needle is securely closed inside activated safety cover
- latex-free, phthalate-free
- non-toxic, non-pyrogenic
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device designed for intravenous, intramuscular and hypodermic injections

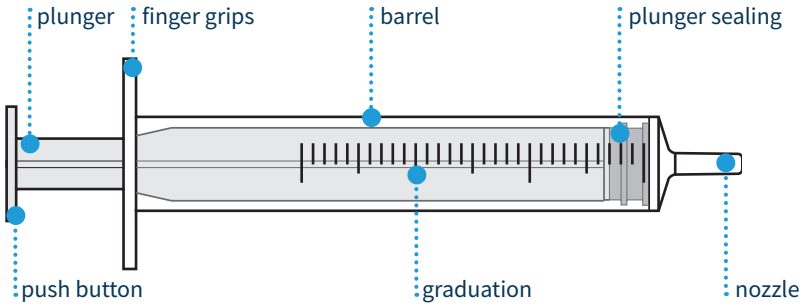
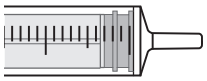
construction of the syringe



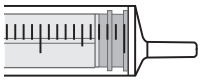
GET TO KNOW OUR SYRINGES

nozzle types:



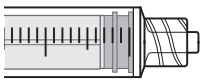
luer slip, centric

tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary



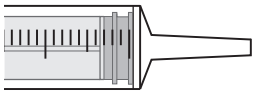
luer slip, eccentric

eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary



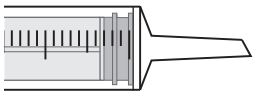
luer lock

designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection



catheter tip 90°

type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes



catheter tip 45°

nozzle cut at 45 degrees increases the lumen surface

insulin and tuberculin syringes

special design of the plunger seal reduces the drug/liquid residues

single-use syringe, 2-part, luer, sterile

features

- white line
- transparent barrel allows full visual control of content
- white contrasting plunger
- luer nozzle centrally located in 2 ml syringe, eccentric in 5, 10, 20 ml syringes
- smooth plunger sliding
- limitation flange securing against accidental removal of plunger
- clear, legible and permanent black graduation facilitating dosage, adequately:
  - every 0,1 ml for capacity of 2 ml
  - every 0,2 ml for capacity of 5 ml
  - every 0,5 ml for capacity of 10 ml
  - every 1 ml for capacity of 20 ml
- extended graduation that includes a 10% extension of the nominal capacity
- name of syringe and manufacturer's logo placed on barrel
- single-use
- non-pyrogenic, non-toxic
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- 2-piece syringe for subcutaneous, intramuscular and intravenous infusions intended for drawing up and administering of medicines/liquids to patient and collecting body fluid samples from patient

safeLANCE

pressure-activated safety lancet, sterile

features

- easy to use, minimizes unpleasant feelings
- special construction allows lancet tip to be automatically inserted into finger pad and then to be retracted so that needle is not visible before or after puncturing
- correctly matched size of lancet allows you to get optimal amount of blood with minimal patient's pain
- design ensures safety for medical personnel and patient by eliminating accidental puncture and infection
- perfect guidance of lancet needle inside housing reduces vibration, thus decreases patient's pain and prevents damage to skin tissue
- available in two sizes:
  - 23 G, puncture depth 1,8 mm - blue, dedicated for women and children
  - 21 G, puncture depth 2,4 mm - green, dedicated for men
- latex-free, phthalate-free
- single-use
- sterilized by radiation
- packaging: 100 pcs/box

indication

- capillary blood sampling from fingertip or ear flap for testing, for example, glucose level

insulin pen needle, sterile

features

- made of polypropylene, polyethylene and stainless steel
- triple-point needle blade allows easy and atraumatic skin penetration
- covering the needle with silicone lubricant reduces resistance during injection
- thin walls of needle ensure easy flow of medicine and the right flow rate
- coloured cap and paper cover of packaging make it easy to quickly recognize size of needle
- available in various sizes, allowing you to adapt to individual needs
- universal, compatible with all pen models
- single-use
- non-pyrogenic, non-toxic
- latex-free, phthalate-free
- EO sterilized
- packaging: 100 pcs/box

indication

- for subcutaneous injection
- dedicated for use with pre-filled pens (insulin pens)

stomach tube/duodenal tube

sterile

features

- made of PVC
- made of material that is resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded closed tip
- four lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on packaging
- stomach tube is available in 3 lengths: 80 cm, 100 cm, 125 cm and duodenal tube is available in 150 cm length
- latex-free
- single-use
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- inserted through nose or mouth into stomach or duodenum
- drainage of stomach/intestinal content
- decompression of stomach (air or food evacuation)
- gastric lavage
- taking samples of stomach content
- control of bleeding from the upper section of digestive tract
- evaluation of secretory function
- administration of medicines, fluids and/or food content into stomach or duodenum

suction catheter

sterile

features

- made of soft and flexible PVC, that is resistant to bending and kinking
- frozen surface prevents the catheter from sticking to the wall of the endotracheal tube
- atraumatic, soft rounded, open tip
- tip with two alternating lateral eyes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- single-use
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device designed for suction of secretions from the upper respiratory tract
- recommended for source of suction with its own suction force regulation

dicoSPIKE

withdrawal cannula, sterile

new

features

- easy to use, ergonomic shape
- body with knurled surface for a secure grip
- sharp receiving spike enabling tight and safe connection with containers of different capacity
- receiving spike groove guarantees complete emptying of the container
- hermetic self-locking cap securing the connector against contamination
- available in version with air filter and in version with air and particle filter
- air filter protects against microbiological contamination and against harmful aerosols
- particle filter is an effective barrier to protect drugs and liquids from contamination
- female luer lock connector compatible with products with either male or female luer lock
- free of latex, PVC and phthalates
- non-pyrogenic
- single-use
- EO sterilized
- packaging: 1 pc./ paper-foil

indication

- device for needle-free dissolving and / or withdrawing drugs from multi-dose packages (bottles, vials, etc.) - in both directions
- dicoSPIKE Chemo model is designed for medicines releasing dangerous aerosols such as cytostatics

INFUSION THERAPY

WWW.ZARYS.COM

ZARYS

SANVIflon safe

safety I.V. cannula, sterile

new

features

- has a passive protection against needle stick injury - the sharp part of the needle stylet) after being pulled out will be spontaneously covered by a safety element protecting the user against accidental puncture or injury
- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of polyurethane (PUR), equipped with 6 radiopaque lines
- cannula equipped with coloured suturable wings and a self-closing cap of the upper port colour coded according to size
- handle that allows you to insert with one hand
- hydrophobic filter that prevents blood leakage to outside after inserting the cannula into the vessel
- available in various sizes from 14 G to 24 G
- single-use
- latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc. – hard blister (PVC+TYVEC) with a colour print in accordance with the colour identification of the size

indication

for cannulation of intravenous, peripheral vessels to:

- multiple injections of intravenous drugs
- intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
- maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
- blood transfusions and blood-like preparations
- ensuring vascular access in the event of the need for rapid drug delivery, especially during diagnostic and therapeutic procedures

easyFLOW IS
infusion set, sterile

features

- 2-way sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers/bags
- air inlet with anti-bacterial filter and coloured (blue) flap
- pliable drip chamber, size 6 cm, equipped with additional pressure wings to facilitate insertion into containers with liquids
- dropper: 20 drops = 1 ml +/- 0,1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- min. 150 cm-long, soft, flexible tubing with luer lock conical fitting
- precise safe flow regulator with integrated holder for the closure-piercing device and with hook for securing the tubing
- name of the manufacturer placed on the flow regulator
- both tips of the device additionally secured with protective caps
- device available in a version containing phthalates and without phthalates
- single-use
- non-pyrogenic, non-toxic
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil with a coloured code (blue) identifying the device

indication

- device for fluid transfer in infusion therapy

needle-free valve

sterile

features

- body made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- metal-free, suitable for MRI examination
- male connector of the transparent port is secured with a cap allowing for aseptic removal of the item from the packaging
- may be used for 7 days or up to 350 activations
- priming capacity: 0,09 ml
- high flow rate: 350 ml/min
- withstands injection fluid pressure of 3 bars (44 PSI)
- withstands back pressure of 2 bars (29 PSI)
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- intended for closing infusion ports
- device intended for multiple, needle-free injections (liquid drug administration, blood sample taking)
- protects infusion lines from contamination and infection during infusion therapy
- does not require using safety caps
- dedicated for standard luer and luer lock connectors

foley catheter

3-way, silicone-coated latex, sterile

features

- made of soft and flexible latex, that is resistant to bending and kinking
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- additional inlet for flushing out the bladder
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon
- plastic valve to ensure balloon tightness
- contains latex, does not contain phthalates
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder

foley catheter

2-way, 100% silicone, sterile

features

- made of soft and flexible silicone, that reduces the allergic reaction of the mucous membranes and increases the patient's comfort
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- radiopaque line along the entire length of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- available in version with 10 ml sterile water pre-filled syringe with 10% glycerin to seal the balloon
- separately packed Catheter Spigot inside the packaging
- latex-free, phthalate-free
- single-use
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil
- intermediate packaging: 10 pcs for REF: CFNS-2D-XX-XX-P, 5 pcs for REF: CFNSG-2D-XX-XX-P
- bulk packaging: 40 x 10 pcs for REF: CFNS-2D-XX-XX-P, 50 x 5 pcs for REF: CFNSG-2D-XX-XX-P

indication

- to drain urine from the bladder
- recommended for patients with blood clots or sediment in their urine

urine bag

sterile

features

- latex-free 2000 ml bag made of 0,22 mm thick PVC (double wall)
- double sealed PVC for maximum protection against tearing the bag
- effective non-return valve
- tight T-valve, that can be easily operated with one hand
- connecting tubing with universal stepped connector, standard tubing length 90 cm and 150 cm
- tubing made of material that is resistant to bending and kinking and which ensures a free and effective urine outflow
- precise, easy-to-read scale (every 100 ml), adequate for diuresis measurement
- strengthened holes for hanging, matching standard hangers
- white back wall making urine easy to notice
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./foil

indication

- for 24-hour extracorporeal collection of urine and other body fluids
- maximum time of use - 24 hours

urine bag

with sample port 2W, sterile

features

- latex-free 2000 ml bag made of medical grade PVC
- white back wall making urine easy to notice
- effective non-return valve
- tight T-valve, that can be easily operated with one hand and which can be folded and tucked in a hard sheath
- Pasteur type droplet chamber providing a „dry" air barrier
- two hydrophobic air filters (in a bag and chamber), which prevent sucking, balancing the pressure inside the system
- 120 cm long, large diameter tubing, ensuring a free and effective urinary outflow with a universal stepped connector
- self-tightening port for sample taking at the end of tubing
- tubing equipped with a sliding clamp and a fastening pin to stabilize the tubing
- at the place where the tubing connects to the chamber, an additional reinforcing element prevents bending and kinking the tubing
- precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy, every 25 ml from 25 ml to 100 ml and every 100 ml from 100 ml to 2000 ml
- tag to describe the patient's details and date
- integrated universal hanger system matching the round and square bed rails
- additional fixing with a string
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device is intended for 14-days urine collection in a closed system

REF	capacity	length of tubing
WM2T2000-120	2000 ml	120 cm

vomit bag

non-sterile

new

features

- bag is made of durable, transparent blue or redf foil, enabling the observation of secretions.
- total bag capacity: 2000 ml
- exact measuring graduation (from 10 ml to 100 ml every 10 ml and from 100 to 2000 ml every 100 ml) placed on the bag allows accurate estimation of fluid volume
- direction of graduation reading for small volumes is marked with the tip
- wide bag inlet protected by a plastic collar
- circle-shaped collar ensures a firm grip, makes it easier to maneuver the bag, reducing the risk of content contamination
- collar equipped with a special incision to close the bag and hygienic disposal of the vomit - „twist and hook”
- device name, manufacturer’s name and pictorial instructions for use printed directly on the bag
- single-use
- latex-free
- phthalate-free
- class I non-sterile medical device
- packaging: 20 pcs/foil bag

indication

- recommended in uncomfortable situations, in cases of gastroesophageal reflux requiring immediate action
- used in hospitals, outpatient departments, ambulances, etc.

bulk packaging: 30 x 20 pcs

nebulizer

with mouthpiece and tubing, sterile

features

- made of transparent, non-toxic PVC
- tubing with star cross-section that is resistant to bending
- 15 ml nebulizer (graduated at 2, 4, 6, 9, 12, 15 ml)
- set components: nebulizer, tubing, mouthpiece
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./foil

indication

- designed for producing aerosol containing a comminuted medicine, that can be delivered directly to the respiratory system as the patient breathes

REF	length of tubing
NUD	210 cm +/- 5%

bulk packaging:
50 x 1 pc.

nebulizer

with T adaptor, mouthpiece, corrugated tube and tubing, sterile

features

- made of transparent, non-toxic PVC
- tubing with star cross-section that is resistant to bending
- 20 ml nebulizer (graduated every 2 ml)
- set components: nebulizer, tubing, T adaptor, mouthpiece and 15 cm long corrugated tube
- diameter of T adaptor: 22F/22F
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./foil

indication

- designed for producing aerosol containing a comminuted medicine, that can be delivered directly to the respiratory system as the patient breathes

REF	length of tubing
NUT	210 cm +/- 5%

bulk packaging:
100 x 1 pc.

laryngeal mask

PVC, sterile

features

- made of medical PVC
- elastic mask body with description (size, cuff volume, suggested patient's weight)
- elliptic shape, flexible sealing cuff and universal, transparent connector: 15 mm
- colour-coded valve protection makes it easy to quickly recognize size
- single-use
- latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- device inserted through the mouth, up to the back of the throat, forms a seal at the top of the glottis in order to:
  - direct protecting the patient's airway patency
  - artificial ventilation also during cardiopulmonary resuscitation
  - maintaining airway patency in: short-term surgical procedures, without the need of muscles relaxation, when endotracheal intubation is not necessary and under anesthesia for diagnostic procedures

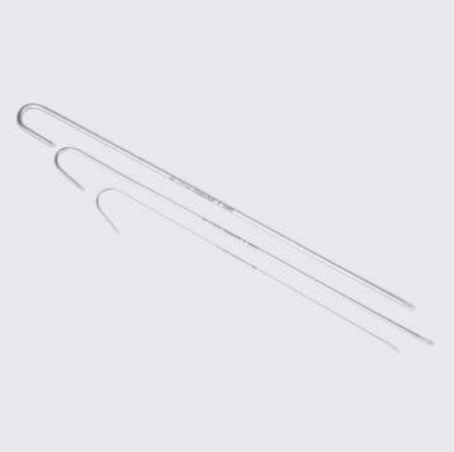
intubation stylet

sterile



features

- made of PVC-coated aluminium
- special material for both stiffness and pliability
- intended for use during difficult intubation
- size and diameter markings
- soft distal tip
- single-use
- phthalate-free
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- allows you to give the endotracheal tube the right curvature
- introduced to the endotracheal tube facilitates intubation in routine and difficult cases, when the laryngeal inlet is not visible

tracheal tube introducer

curved, sterile

new

bulk packaging:
20 x 10 pcs

features

- made of medical grade low density polyethylene
- curved and rounded tip enables safe intubation without damaging the soft tissues
- optimum flexibility and rigidity facilitate correct insertion and safe removal of the introducer after intubation
- imprint of the size, diameter and manufacturer's name on the device
- bright yellow body for increased visibility of the introducer in the tracheal tube canal
- clear, easy to read graduation every 1 cm
- available in three sizes and lengths
- single-use
- PVC free
- latex-free
- phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for use during difficult intubation procedures
- as an aid to facilitate the insertion of the endotracheal tube during standard intubation

reinforced endotracheal tube

cuffed, sterile

features

- made of flexible PVC
- reinforcing within the wall of the entire tube
- equipped with lateral Murphy eye and radiopaque line over the entire tube length
- graduated every 1 cm, double depth marker to control the position of the tube
- tube size marked in 4 places (on the connector, on the pilot balloon and in two places on the tube body)
- indissiociable connector with an outer diameter of 15 mm
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure
- for intubation of the patient in an unusual position, with a high risk of kinking the endotracheal tube

endotracheal tube holder

sterile

features

- made of high-quality materials
- universal Velcro fasteners enabling fast and effective fixing of the holder around the head
- adjustable handle allows for easy and fast fixation of every size of endotracheal tube
- special design of the bite-piece prevents patient trauma or damaging the tube (by biting)
- additional opening allows for chyme, saliva and blood suction from the oral cavity
- single-use
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- to stabilize the position of the endotracheal tube after its insertion into the trachea

REF	version	colour
SRI-N	horizontal fixation	blue-red
SRI-A	vertical fixation	green

bulk packaging:
100 x 1 pc.

tracheostomy tube

cuffed, sterile

features

- made of medical, flexible PVC
- swivel 15 mm connector
- flexible neckplates with slits for strap insertion to secure tube position
- soft, low-pressure, thin-walled cuff
- pilot balloon in contrasting colour clearly indicates the level of the cuff's inflation
- 2 fixation straps protected with foil
- clear size marking on the neckplates
- atraumatic, soft rounded tip, curved cannula
- radiopaque line
- equipped with obturator
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./rigid blister

indication

- to control respiratory tracts in people after tracheostomy
- introduced to the airways by a surgical incision of the tracheal's front wall to allow ventilation
- provides free breathing bypassing the nose, throat and larynx

dual-limb breathing circuit

sterile

features

- made of high quality EVA material, without PVC
- 15F/22M and 22F universal connector fits compatible products and devices for mechanical ventilation or anesthesia machine
- expandable arms with maximum length of 160 cm
- adjustable length of circuit enabling adjustment of length of respiratory system and optimization of dead space
- equipped with latex-free breathing bag: 3l (for adults) or 1l (for children)
- additional expandable tube, length: 100 cm
- elbow with luer lock port
- single-use
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./foil

indication

- for patient's mechanical ventilation
- it enables transporting breathing mixture from equipment (ventilator, anesthesia machine) to respiratory protection device (e.g. tracheal tube, tracheostomy mask) and vice versa

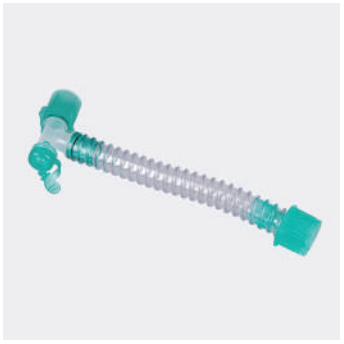
REF	purpose	capacity of bag
OBWD-1601L	for children	1 liter
OBWD-1603L	for adults	3 liters

bulk packaging:
40 x 1 pc.

catheter mount with double swivel elbow connector

sterile

new



features

- smooth bore type made of medical PVC
- expandable type made of high quality PE, EVA
- universal patient connection: 22M/15F
- ventilation device side connector: 15M or 22F
- expandable version characterized by shape memorizing and by the ability to control the position of the connector
- double swivel elbow connector
- port for suctioning and bronchoscope secured with a stopper
- available in versions: smooth bore and expandable
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./paper-foil

indication

- used to connect the tracheostomy tube or endotracheal tube with the breathing circuit of the ventilation device
- provides greater mobility and rotation of the connection, increasing patient comfort and safety

oropharyngeal airway/guedel airway

sterile

features

- made of high quality PE (polyethylene), free of PVC
- distinctive anatomical curve of airway tube allows for the opening of the upper respiratory tract and the free flow of anaesthetic gases, air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- latex-free, phthalate-free
- EO sterilized
- packaging: 1 pc./foil

indication

- used during artificial ventilation procedures to ensure the airway patency
- as a tool for paramedic to assist in the management of a casualty's airway which increases the effectiveness of the rescue operation
- facilitates the stabilization of the endotracheal tube and protects it against biting

air cushion anaesthetic mask

non-sterile

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- retaining ring can be removed when it is not needed
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient's face
- single-use
- latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

indication

- intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient

Yankauer surgical suction cannula

standard CH21, sterile

features

- completely transparent for full possibility of observing the sucked secretion
- light and perfectly balanced handle ensures high comfort of work and reduces hand fatigue
- perfectly smooth inner surface prevents blocking or retaining the sucked content, ensuring correct and optimal flow
- cannula with double bend of curvature
- four lateral eyes, which prevent the tip from sticking to the tissues and one central opening
- universal stepped connector ensures tight connection with a wide range of suction connecting tubes
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- evacuating secretions and body fluids from the operating field in general surgery

surgical suction tube

sterile

features

- made of soft and flexible PVC
- along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
- perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow
- connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)
- funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
- tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection
- single-use
- latex-free
- EO sterilized
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

bulk packaging:
50 x 1 pc.

indication

- device designed for connecting the suction cannula to medical suction device

features

- components: blue stretchy strap and white ABS plastic buckle
- length 480 mm +/- 10 mm, width 25 mm +/- 10 mm
- wide, stretchable band put above the venipuncture site reduces the pressure intensity
- protects against the congestion of the arm, minimizes unpleasant sensations, improves the quality of the blood sample
- reusable
- contains latex, phthalate-free
- non-sterile
- packaging: 1 pc./double packaging: internal- foil, external- box

indication

- used to induce venous stasis and to make a vein selected for puncture more prominent

REF	intermediate packaging
SA-001	21 pcs

bulk packaging:
20 x 21 pcs

dental brush

with suction, non-sterile

features

- made of polypropylene
- soft bristles on one side, foam on the other side
- total length 18 cm
- length of the cleaning part 2,5 cm
- suction opening from both the bristle side and the space between the foam and the bristles
- controlled suction connector at 45° angle for convenient manipulation
- single-use
- latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

indication

- hygiene of the patient's oral cavity
- function for simultaneous brushing, rinsing and suction

REF	intermediate packaging
HJM-SO	50 pcs

bulk packaging:
10 x 50 pcs

oral swab

non-sterile

features

- overall length 15 cm (+/- 2 mm)
- length of the foam part 2,5 cm
- handle made of polyester
- swab made of polypropylene
- single-use
- latex-free, phthalate-free
- non-sterile
- packaging: 1 pc./foil

indication

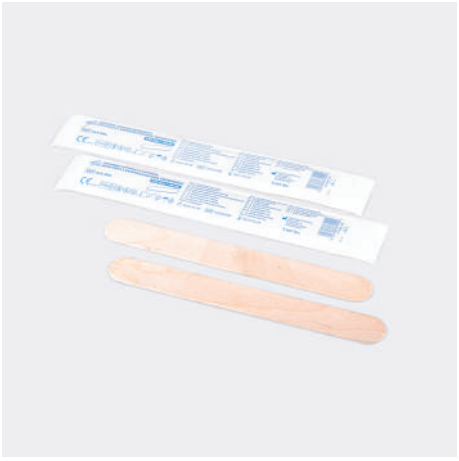
- intended for oral hygiene in patients partially or completely dependent on medical personnel
- allows the oral mucosa to be kept in proper humidity
- allows you to perform a procedure to prevent pathological changes in the mouth

REF	intermediate packaging
HJM-GB	50 pcs

bulk packaging:
10 x 50 pcs

tongue depressor

wooden



features

- made of birch wood
- rounded edges preventing injuries
- natural colour
- long outreach thanks to appropriate length
- durable
- single-use
- available in sterile or non-sterile version
- packaging: sterile - 1 pc./paper, non-sterile - 100 pcs/box

indication

- diagnostic examination of the oral cavity

REF	version	dimensions	bulk packaging
SLN-001	non-sterile	150 mm x 17 mm	50 x 100 pcs
SLS-001	sterile	150 mm x 17 mm	20 x 100 pcs

Wash glove
molton

features

- wash glove in the form of a glove to put on a hand
- made of MOLTON material
- ultrasonic sewing
- soft, smooth, gentle and absorbent
- dry, without cleaning agents
- tear resistant
- single-use

ID wristband

non-sterile

features

- durable wristband coating characterized by high humidity resistance and resistance to the activity of soaps, hand disinfectants and other liquids used in hospitals
- made of soft and delicate vinyl
- flexible, delicate, very light and easy to put on
- rounded edges prevent from injuring
- high tensile strength
- colour marking depending on the purpose
- single-use fastening resistant to accidental break
- hypoallergenic, latex-free, phthalate-free
- available in a version with a description field directly on the band and with an insert card
- non-sterile
- packaging: 100 pcs/box

indication

- for identification of patients in hospital wards

REF	purpose	colour	version	intermediate packaging
OPD-B-01	for children and adults	white	insert card	100 pcs
OPD-B-02	for children and adults	white	write-on	100 pcs

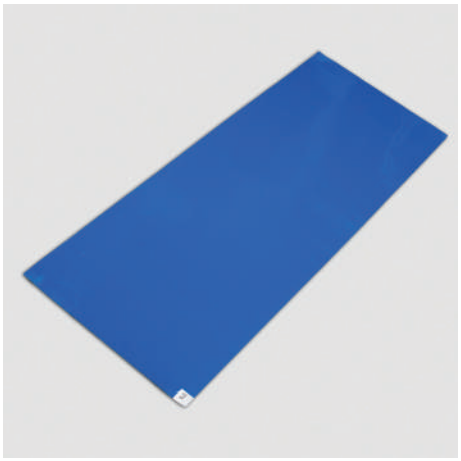
OPN-N-01	for infants	blue	insert card	100 pcs

bulk packaging:
50 x 100 pcs

entrance mat

non-sterile



features

- blue mat consisting of 30 layers - thin sticky sheets
- each of the sticky sheets made of polyethylene resin
- does not contain heavy metals
- excellent adhesive properties
- the first and last sheets secured with a non-adhesive foil
- low mat profile: app. 2 mm thick
- the bottom surface adheres very well to the floor over the entire surface, preventing adverse movement of the mat, allowing trouble-free passage of trolleys with equipment or beds, without the risk of curling up the mat or tearing
- no need to clean the mat - as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean sheet
- there is numbering of sheets on a white non-adhesive material in the mat corner facilitate quick identification and easy removal of subsequent sheets
- light, easy to spread
- non-sterile

indication

- preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

REF	dimensions	intermediate packaging
M001	45 cm x 115 cm	10 pcs

bulk packaging:
5 x 10 pcs

PE gloves

non-sterile

features

- made of polyethylene
- coarse surface and tear-resistant weld
- ambidextrous
- elongation min. 130%, tensile strength min. 10 MPa
- approved for contact with food
- single-use
- non-sterile
- packaging: 100 pcs/foil bag enabling individual removal of gloves

indication

- intended for use as a contribution to other gloves (double-gloving) and for minimally invasive procedures such as drug preparation, feeding the patient

REF	size	length
RF-M	M (women)	280 mm
RF-L	L (men)	300 mm

bulk packaging:
100 x 100 pcs

PE apron

non-sterile

features

- made of polyethylene
- transparent
- worn around the neck, tied at the back using straps
- single-use
- non-sterile
- packaging: 1 pc./foil

indication

- intended for medical staff as an additional protection in wet procedures, such as preparing medicines, washing the patient, feeding the patient

FF-71x180	180 cm / 71 cm	100 pcs

bulk packaging:
10 x 100 pcs

Dressings

Dressing materials have for years been the core of patient care. Constant development in this field causes more advanced products to appear next to the basic ones only. Dressing does not translate into using only the basic compresses and tapes any more. Naturally the function of each dressing depends on the requirements, overall patient health and the conditions in which the product is to be used.

The offer of ZARYS Inernational Group falls into a few categories and encompasses a complex range of solutions such as:

- gauze and non-woven dressings, compresses and drapes whose main function is to absorb the exhudate and dress the wound in hospital and home care conditions,
- adhesive tapes made of various materials used for dressing and drain fixation as well as dressings with absorbent pads that enable fast dressing of minor injuries,
- special purpose dressings composing of solutions dedicated to specific conditions such as the dressing of post-operative wounds, cannula and drain fixation,
- supporting dressings- including products such as knitted and elastic bandages and tapes,
- stiffening dressings- including padding and P.O.P. bandages.

ZARYS

TRADITIONAL DRESSINGS MATERIALS

ZARYS

GAUZE AND NON-WOVEN DRESSINGS

DRESSING GAUZE

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- soft and very absorbent
- increase in absorption capacity with increasing number of gauze threads
- homogeneous structure through a strong twist of fibers eliminates the risk of loose fibers on the surface

indication

- general wound dressing in out-patient clinics, surgical sites, procedure department

GAUZE LAP SPONGES

features

- 100% hydrophilic cotton
- bleached with the use of hydrogen peroxide
- with a sewed in X-ray detectable thread or chip, which enables fast and non-invasive identification of the lap sponge left in the operating field
- with a belt to fix the lap sponge beyond the operating field

indication

- as a surgical invasive dressing material for intraoperative absorption of large amounts of blood and body fluids from surgical wounds

Before use on open wounds, the device must be sterilized in accordance with a validated sterilization method. It can be sterilized with steam or ethylene oxide.

803212	5 cm x 7,5 cm		absorbent pad - white non-woven material - skin colour	1 pc.	50 x 1 pc.

HOW TO CHOOSE A DRESSING PROPERLY?

When choosing the proper type of dressing, pay special attention to:

- absorption rate and absorption capacity,
- vapor permeability,
- possibility of an atraumatic dressing change,
- safety of use.

SELF-ADHESIVE DRESSINGS FOR KIDS

features

- self-adhesive dressing with absorbent pad, made of hydrophobic non-woven material with color overprint, covered by hypoallergenic glue
- absorbent pad coated with polyethylene mesh to prevent sticking to the wound, absorbing small and medium amounts of exudate and protecting against external influences
- rounded edges to prevent accidental removal of the dressing
- protective layer of silicone paper for precise, painless and effective application
- micropores in the non-woven material structure provide an adequate rate of moisture vapour permeability so correct gas exchange between the dressing and skin is guaranteed

non-woven IV cannula dressing

elastoKIDS IV

STERILE sterile

features

reusable

elastic tubular net bandage

elastoNET

non-sterile

features

- elastic net bandage in the form of a tube
- contains polyamide and elastomer
- high stretchability and strength of returning to pre-stretch state
- elastic and very soft
- easy and quick to use
- length before stretching:
  - 1 m, stretched: 2,5 m
  - 10 m, stretched: 25 m

indication

- fixation of all dressings on the patient's body, replacing the traditional bandage
- the use of tubular net bandage reduces the time of wound dressing and makes it easier to fix the dressing to the patient's body

How to make a HIPOCRATES CAP?

FIRST AID FOR DRESSING WOUNDS USING BANDAGES

Hippocrates' achievements in treating head wounds were so widespread and advanced that they are still used today. The Hippocrates cap also called "mitra is a headgear that allows you to hold the dressing and stop bleeding of the head wound. It is made of two bandage tapes. The main purpose of using the Hippocrates cap is to hold the dressing directly protecting the bleeding head wound, seal and warm the head, hold the compress applied to the skull area, compression, strengthening and immobilization after surgery and additional protection against the external environment. This solution is used in the absence of access to dressings such as elastic dressings and scarves.

RULES FOR BANDAGING

1. Prepare a two-head bandage about 5-6 cm wide by sewing together two bands or by twisting the free end to the middle.
2. Put the two-headed bandage on the back of the head and drive bandage to the forehead a circular move.
3. Cross the bandages on the forehead and drive one through the top of the head towards the occiput by a longitudinal move.
4. Drive the other bandage above the ear to the occiput also (half-round).
5. Scroll the longitudinal course through the circular course bandage.
6. Drive back the longitudinal course bandage across the top of the head to the forehead.
7. Drive the circular course bandage around the other ear to the forehead
8. Continue longitudinal and circular moves, the circular course bandage wraps around the scalp
9. Little by little, move the longitudinal course bandage towards the temples
10. After covering the whole area with a two-head bandage, fix the ends of bandage

ORTHOPEDIC PADDINGS

features

- very soft and fluffy
- adhere well and adjusts to the shape of the body
- coherent structure resistant to stratification makes it easier placement of the immobilizing dressing
- minimize the risk of skin abrasions and irritations under the P.O.P. bandage
- do not absorb moisture and thus do not allow for its contact with the skin
- hypoallergenic

indication

- as a protective layer put under plaster of Paris bandages
- in compression therapy as a padding under the bandages of various elasticity

made of viscose

triangular sling

elastoSLING

non-sterile

features

- triangle shaped sling made of non-woven or cotton
- thin, light and elastic - comfortable for the patient, adjusts to the shape of the body, provides freedom of movement
- possibility of connecting several slings to achieve bigger immobilization
- hypoallergenic

indication

- short-term immobilization and support of the upper limb in case of various injuries e.g. dislocation or fracture of collar bone, humerus, forearm or hand bone

REF	dimensions	description	packaging unit zipper pouch	bulk packaging foil bag
CHTW9696136	96 cm x 96 cm x 136 cm	non-woven	1 pc.	12 x 1 pc.
CHTB9696130	96 cm x 96 cm x 130 cm	cotton	1 pc.	12 x 1 pc.

HOW TO PROPERLY PUT ON A TRIANGULAR SLING?

1. Place the triangular sling on the patient's body so that one of the corners of the sling is at the level of the elbow of the immobilized hand.
2. Place the second corner of the sling on the opposite arm in relation to the immobilized hand.
3. Carefully place the sick / injured limb on the sling.
4. Wrap the sick/injured limb with dangling, third corner of the sling.
5. Make sure that the hand is in the right position, and then tie the corners of the sling around the neck.

P.O.P. BANDAGES

features

- made of cotton gauze coated with natural plaster of Paris on both sides
- on a plastic roll
- enable fast and durable immobilization
- before fixing need to be soaked in a container with water at 20°C temperature
- do not absorb X-rays

indication

- large and small immobilizing dressings in orthopedic, ambulatory and surgical procedures

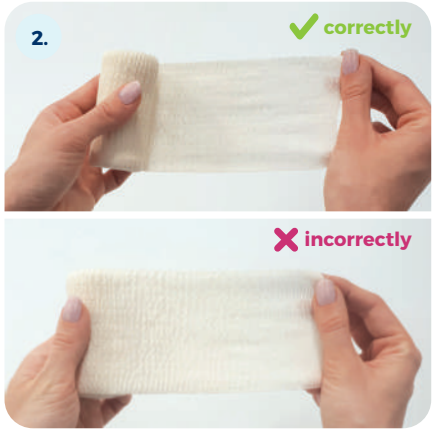
RULES FOR BANDAGING

1.

Select a bandage of proper type and size for the part of the body to be bandaged.

2.



With your right hand, grasp the beginning of the band, and with your left hand hold the rolled part so called "head".

3.

Put the patient in a comfortable position supporting the bandaged lower or upper limb.

4.

For proper stabilization of dressing, start bandaging with a circular wrap, each subsequent layer covers exactly the previous one in a durable and aesthetic way. Little by little unroll the band during bandaging. Finish the bandaging with a circular wrap, end of the dressing secure with a clip or tie it.

5.

The bandage should adhere correctly to the patient's body and be rolled up with adequate power – too much pressure can lead to impaired circulation, too loose it will slide and fall.

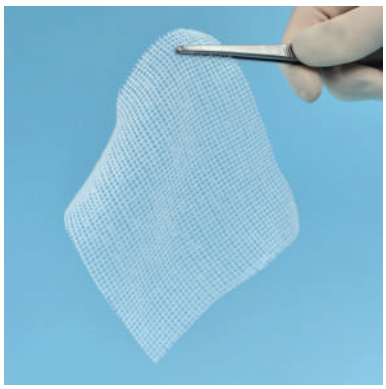
6.

Remove the bandage by transferring it from one hand to other to minimize patient movement.

SPECIALIST DRESSINGS

WWW.ZARYS.COM

ZARYS



soaked with paraffin

possibility of cutting

paraffin gauze dressing

paraffiNET

STERILE sterile

features

- wide-mesh dressing made of cotton gauze covered with paraffin
- structure of the carrier material allows exudate to be freely drained to the covering secondary dressing
- covering with a layer of paraffin reduces risk of adhesion to the wound and allows a painless change of dressing
- neutral properties of paraffin allow for using the dressing in combination with other preparations containing medicinal substances or antiseptics
- can be shaped and cut according to the needs aseptically
- needs to be covered with a dressing with absorbent properties, e.g. compress, high-absorption dressing, polyurethane foam
- non-adhesive, necessary fixing with a tape, bandage or net tubular dressing
- hypoallergenic

indication

- keeping proper moisture in the wound
- preventing the wound edges from dying and maceration
- recommended for uninfected wounds
- treatment of chronic wounds: various ulcers, bedsores
- treatment of surgical and burn wounds, skin donor and grafting sites, skin damage, cuts
- protection against radiation skin damage

A NEW APPROACH TO WOUND HEALING

The most important factor affecting the effectiveness of wound healing is maintaining constant humidity within the wound. George D. Winter is a precursor of wet wound therapy, who in 1962 published his observations after experiment of creating a moist environment under polyurethane film and observing wound healing. Experience has shown that the wound heals under these conditions twice as fast as in unprotected conditions with a special film dressing.

Maintaining a moist environment in the wound stimulates the self-cleaning process, facilitates the autolysis of dead tissue, granulation growth, reduce the healing time.

It also prevents the dressing from sticking to the wound, allowing it to be changed without pain. While removing dressing there is no secondary tissue damage.

FOIL DRESSINGS

features

- made of polyurethane film
- covered with hypoallergenic acrylic glue
- transparent - they allow observation of the dressed place without the need to remove the dressing
- vapour permeability guarantees correct gas exchange between the dressing and the skin, and prevents it from excessive moisture accumulation and maceration
- barrier against microorganisms and bacteria, minimizing the risk of infection
- very thin and elastic - adjust to the shape of the body, guarantee freedom of movement
- waterproof
- self-adhesive
- hypoallergenic

1. Remove the back paper protection.

2. Apply the dressing to the desired place.

foil dressing

STERILE sterile

features

- "frame" or three-stage" application system makes dressing placement precise and accurate

BETAtex

Medical clothing

It is extremely important for us to offer our clients products that ensure high standards of working conditions and comfort of use.

In order to achieve this goal, we have created a line of high quality products made of different types of non-woven materials:

- polypropylene non-woven
- SMS non-woven
- Spunlace non-woven
- viscose non-woven
- Spunlace Mesh non-woven

A combination of several factors such as optimal design, perfect fit, breathability and structure makes BETAtex products comfortable and reliable.
A wide range of solutions will certainly meet our clients' individual preferences and secure both medical personnel and patients' comfort and dignity.

BETA safe

PROTECTIVE COVERALL SAFE+
AGAINST CHEMICAL AND INFECTIVE AGENTS
TYPE 4b - 5b - 6b

Personal protective equipments (PPE) are products that protect against one or more risks to the user's health or safety. These products must comply with Regulation (EU) 2016/425 of the European Parliament and of the Council. PPE is classified into three categories according to the degree of risk.

The coverall is a PPE category III in accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council

The category III covers products of complex construction, intended to protect health or life against risks that may cause death or irreversible damage to health.

features:

- made of a laminate (non-woven polypropylene and polyethylene) with a weight of 63 g/m^2
- polyester seams additionally covered with tape
- equipped with a hood with elastic trim
- equipped with an elastic waist band, wrists and ankles
- zipper covered with a self-adhesive flap
- available in version with boots

Standards:

Coverall is personal protective equipment of category III in conformity with Regulation (EU) 2016/425 of the European Parliament and of the Council

EN ISO 13688:2013 Protective clothing. General requirements

TYPE 4 B
EN 14605:2005 +A1:2009

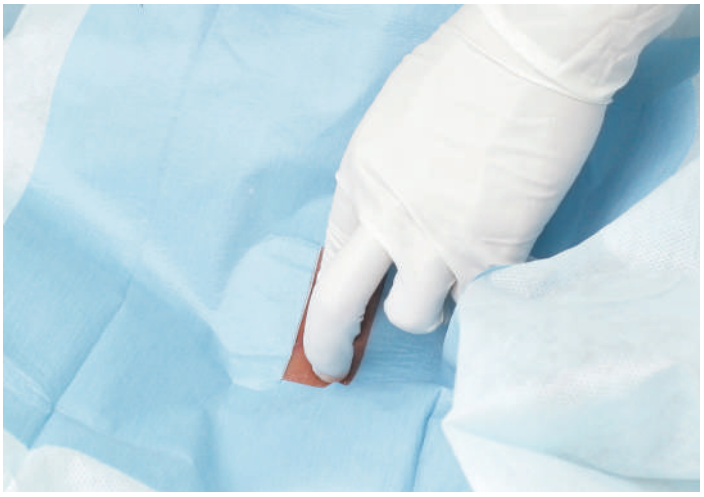
ALPHAtex



Surgical sets, drapes and surgical gowns

Preventing infections in the operating field is a priority for all medicals. Thanks to our complex offer of single-use protective solutions of ALPHAtex STANDARD, STANDARD+, COMFORT, the post-procedural complications and risk of infection in the operating field are minimized while increasing the protection barrier against the potentially pathogenic germs residing in the human skin layers. We offer:

- patient and equipment drapes
- sets of surgical drapes
- incise films
- surgical covers
- adhesive tapes
- accessories such as fluid collection pouches
- surgical gowns

Properly selected features of surgical drapes provide safety and comfort of use to medical staff and patients. A variety of multi-layer non-woven and laminates reinforced in critical areas in lines STANDARD+ and COMFORT allow to adjust our solutions to particular surgical procedures with maximal cost efficiency.

ALPHAtex products are characterized by parameters frequently exceeding the requirements of EN 13795 for 'Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment'.

Moreover, they provide a successful protection against the risk of infection in the operating field. Practical solutions and composition of our sets enable their quick and simple application while performing medical procedures.

ZARYS

Prevention of surgical site infection

ALPHAtex

Surgical site infection (SSI)

is defined as infection occurring up to 30 days after surgery, when there is a possibility of microorganisms penetration into the open surgical wound. Microorganisms could have various sources EXOGENOUS (carried by an external factor as medical staff or medical devices) or ENDOGENOUS (patient's bacterial flora from the closest area surrounding the surgical postoperative wound). The most important routes of infections are airway or contact path. Various type of barriers are used to minimalize the surgical site infections: surgical drapes, surgical gowns and medical equipment covers.

Surgical drapes
(the names are based on the EN 13795 standard)

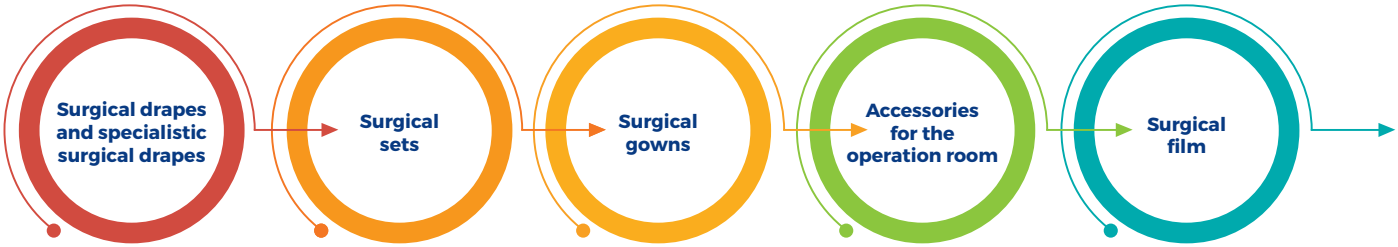
Surgical drapes are used to ensure clean microbiological surgical wound surrounding, minimalize the microorganisms migration from patient skin to surgical wound and to supervise the spreading of body fluids from the wound area. Surgical drapes meet the requirements of medical device in accordance with the Directive 93/42/EEC.

Surgical gowns
(the names are based on the EN 13795 standard)

Surgical gowns are used to prevent direct microorganisms transmission from medical staff to patient. Moreover, surgical gowns prevent spreading of exfoliated epidermis in the air of the operating room.

The wide range of ALPHAtex products it's an effect of over 30 years of ZARYS International Group existence on medical market. Sharing our experience and knowledge we are convinced that using ALPHAtex products will provide comfort, safety and economic effectiveness during daily work in the operating room.

Complex offer of ALPHAtex products contains:



Surgical drapes and specialistic surgical drapes	Surgical sets	Surgical gowns	Accessories for the operation room	Surgical film
in different sizes and weights	with additional ALPHAtex products intended for specific surgical procedures	in wide range of sizes, weights, materials, with or without reinforcement	as fluid collection pouches, medical device covers, camera covers	in different sizes

ZONES OF SURGICAL DRAPES ON PATIENT

ZONE 4

NOT HAVING ANY CONTACT WITH PATIENT'S BODY
performs the function of anaesthetic cover and operating table cover

ZONE 2

DIRECT SURROUNDINGS OF OPERATING FIELD
in this zone surgical drape has got contact with not disinfected patient's body

ZONE 3

PARTIAL CONTACT WITH NOT OPERATED PARTS OF PATIENT'S BODY
occasionally exposed to body fluids

ZONE 1

OPERATING FIELD
disinfected patient's skin in direct surroundings of surgical wound, mostly protected by incise film

Surgical sets ALPHAtex

contains different disposable medical devices

- surgical drapes
- specialistic surgical drapes
- surgical gowns
- wound dressing
- non-woven swabs
- fluid collection pouches
- medical covers
- disposable medical devices as umbilical cord clamp

Features of disposable surgical drapes ALPHAtex used in the operating room

- Barrier - provides perfect safety from microorganisms
- Elastic and easy to apply on patient
- Breathable - provides thermal comfort
- Disposable
- High absorbent capacity
- Good mechanical properties
- Skin friendly - does not contain latex
- Equipped with legible pictograms
- Wide range of single drape sets
- Resistant to fluid penetration
- Non-sensitizing and non-irritating
- High quality materials
- Sterile - decrease the risk of surgical site infection
- Lighter and less dusty comparing to reusable surgical drapes

ALPHAtex

SURGICAL DRAPES

BASIC TYPES OF MATERIALS USED IN SURGICAL DRAPES:

PF DRAPE - two layer material of the drape containing absorbency layer of celulose on top and PE foil layer of the drape on back

NF, NFA, NFF, NFFA, NFFAR DRAPE - two layer material of the drape containing absorbency layer of non-woven material on top and PE foil layer on back of the drape

NFN, NFNA, NFNF, NFNFA DRAPE - three layer material on the drape containing absorbency non-woven layer on top, PE foil layer in the middle and non-woven absorbency layer on the back of the drape

do not cut the incise film

- thin incise film made of polyurethane
- flexible
- perfectly fits the patient's body
- double packed: externally paper-foil, internally paper

CELLULOSE

Cellulose is a solid with typically fiber structure. Two-step process is used for industrial manufacturing of cellulose fibers, which was developed in 1892. Cellulose raw material is used in different industries as textiles and paper as well as in production of explosives.

TRUE OR FALSE?

"I am too young / too old for hip replacement."

NOTHING COULD BE MORE WRONG!

Hip endoprosthesis is performed in patients from a wide age range. Very important is patient condition, however this is only one factor which classifies patient for procedure.

Standard EN 13795-1:2019

Essential requirements for surgical drapes and surgical gowns results from directive 93/42/EEC and have been included in EN 13795 standard "Surgical drapes, gowns and clean air suits, used as medical devices for patients, clinical staff and equipment". The purpose of EN 13795 standard is to maintain stable level of surgical drapes and surgical gowns safety for whole using period as well as minimalization of direct microorganisms transmission from medical staff to patient during surgical procedures.

SURGICAL GOWNS

CHARACTERISTICS	STANDARD	UNIT	REQUIREMENT

SPORT

Cohesive bandages, kinesiotapes and others...

yellowSPORT is a brand offering comprehensive solutions in the field of sports medicine - according to the best practices that have been developed during physical activity tests. Based on the knowledge and experience of experts, the product line is dedicated not only to sportswomen and sportsmen but also to people taking their first steps to improve their physical activity (recreation).

yellowSPORT is primarily a tribute to, among others, physiotherapists, personal trainers, medical staff, sports clubs and owners of rehabilitation clinics. It creates an excellent base and product base while maintaining the expected ratio between cost and required quality.

The offer of products from the **yellow**SPORT family was prepared by specialists in the field of medical devices and physiotherapy. Therefore, from the very first day of its presence on the market, the „yellow brand" is a concrete response to the real needs of users, regardless of the level of advancement in the field of physical activity or just recreation.

don't be shy, be yellow

ZARYS

yellowBAND

COHESIVE BANDAGE

USE:

- fixation of all types of non-adhesive dressings, especially where the elastic band slides
- fixation of splinting rails
- in compression therapy
- reducing joints mobility after an injury

FEATURES:

- 1-layer, breathable, made of non-woven
- cohesive - it coheres to itself, does not adhere to skin, hair or other materials
- latex-free

AVAILABLE SIZES AND COLOURS:

2,5cm x 4,5m	—	—	—	YCB-2545-X	—	YCB-2545-B	—	—	—	—	—	—	—	—
5cm x 4,5m	YCB-545-S	YCB-545-Y	YCB-545-G	YCB-545-X	YCB-545-R	YCB-545-B	YCB-545-W	YCB-545-BC	YCB-545-IO	YCB-545-IG	YCB-545-GP	YCB-545-VP	YCB-545-XP	YCB-545-PH
7,5cm x 4,5m	YCB-7545-S	YCB-7545-Y	YCB-7545-G	YCB-7545-X	YCB-7545-R	YCB-7545-B	YCB-7545-W	YCB-7545-BC	YCB-7545-IO	YCB-7545-IG	YCB-7545-GP	YCB-7545-VP	YCB-7545-XP	YCB-7545-PH
10cm x 4,5m	YCB-1045-S	YCB-1045-Y	YCB-1045-G	YCB-1045-X	YCB-1045-R	YCB-1045-B	YCB-1045-W	YCB-1045-BC	YCB-1045-IO	YCB-1045-IG	YCB-1045-GP	YCB-1045-VP	YCB-1045-XP	YCB-1045-PH

yellowTAPE

KINESIOTAPE

USE:

- kinesiotaping (dynamic taping)
- ensures nutrition of tissues and accelerates their recovery
- improves the biomechanics of movement without restraining joint's mobility
- reduces pain by affecting sensory receptors

FEATURES:

- elastic, breathable tape made of cotton
- wave-like acrylic coating

AVAILABLE SIZES AND COLOURS:

5cm x 5m	YT-55-S	YT-55-Y	YT-55-X	YT-55-B	YT-55-P	YT-55-RZ	YT-55-4
7,5cm x 5m	YT-755-S	—	YT-755-X	—	—	—	—

yellowRIGID TAPE

SPORTS TAPE, LINE GLUE COATING

USE:

- athletic (rigid) taping
- sports injuries prevention
- protecting the joints from excessive mobility after the injury, which allows for activity continuation
- protection of the areas exposed to abrasions

FEATURES:

- non-elastic, breathable tape made of cotton
- acrylic coating
- serrated edges - no need for scissors
- alternate arrangement of the stripes covered with glue and those without it form grooves that allow free sweat and water flow that reduces the tape's sensivity and increases its resitance to enviromental conditions

AVAILABLE SIZES AND COLOURS:

YRT-2591-W	YRT-3891-W	YRT-591-W
2,5cm x 9,1m	3,8cm x 9,1m	5cm x 9,1m

yellowSPORTS TAPE

SPORTS TAPE

USE:

- athletic (rigid) taping
- sports injuries prevention
- protecting the joints from excessive mobility after the injury, which allows for activity continuation
- protection of the areas exposed to abrasions

FEATURES:

- non-elastic, breathable tape made of cotton
- acrylic coating
- serrated edges - no need for scissors

AVAILABLE SIZES AND COLOURS:

YST-2591-W	YST-3891-W	YST-591-W
2,5cm x 9,1m	3,8cm x 9,1m	5cm x 9,1m

yellowWRAP

FOAM UNDERWRAP

USE:

- skin protection during athletic taping
- ensuring correct base for athletic taping in hairy areas
- protecting from abrasions caused by orthoses or sport equipment

FEATURES:

- made of polyurethane foam
- porous structure allows for air flow and moisture drainage

AVAILABLE SIZES AND COLOURS:

YW-07-S
7cm x 27m

yellowFOAM

FOAM TAPE

USE:

- stabilization, protection and fixation of non-adhesive primary dressings put directly on wounds or injured skin
- protection of the areas exposed to abrasions when the epidermis is undamaged e.g. while wearing new shoes or another equipment

FEATURES:

- waterproof tape made of polyethylene foam
- acrylic coating

AVAILABLE SIZES AND COLOURS:

YF-55-S

5cm x 5m

scissors

FOR SPORTS TAPES

USE:

- for cutting sports tapes or other adhesive tapes

FEATURES:

- sharp blades ensure precision of the cut
- covered with teflon preventing the tapes from adhesing to the blade
- ergonomic shape fits perfectly in hand ensuring comfort of using
- length of the blade: 21 cm

REF number: YC-X

yellowBOX

DISPENSER FOR KINESIOTAPES

USE:

- storing and transporting of tapes
- protects from contamination and damage
- "rolling" core makes it easy to cut the desired length of tape

FEATURES:

- made of hard PVC
- suitable for tapes of 5 cm width

REF number: YB
