

XNY NOVA™ DISPOSABLE LINEAR CUTTER STAPLER

NOVA 
SURGICAL STAPLERS

XNY Nova™ disposable linear cutter staplers are meticulously designed for the excision, transection and stapling in abdominal, gynaecological, paediatric and thoracic surgeries. Focusing primarily on great functionality, reliability and superior performance we ensure the user experience is flawless. XNY linear cutters deliver extremely smooth cutting and secure staple line formation throughout our Nova range.

CARTRIDGE WITH CUTTING KNIFE

Cutting knife is designed on the cartridge to ensure smoother, more precise and safer cutting performance while reducing the possibility of tumor metastasis.

DOUBLE-SIDE FIRING BUTTON

The device with a double-side firing button can be fired from both sides which makes the operation more convenient.

FEATURES AND BENEFITS

- Reloadable 10x with a total of 11 firings per device
- Superior, smooth and staple performance with perfectly formed ‘B’ shaped staples
- Secure staple line formation, with 4 staples beyond the line of resection
- Built-in safety lock-out mechanism
- More staple height options are available for various tissue thickness
