## Angiographic Catheter

An angiographic or diagnostic catheter is intended for use in angiographic procedures. It delivers radiopaque media and therapeutic agents to selected sites in the vascular system. It is also used to lead a guidewire or a catheter into the target site. The OUTLOOK 4 Fr (1.40mm) has a large lumen to allow contrast media to be injected at high flow rates and is designed towards exhibit good torque control.<sup>1</sup>

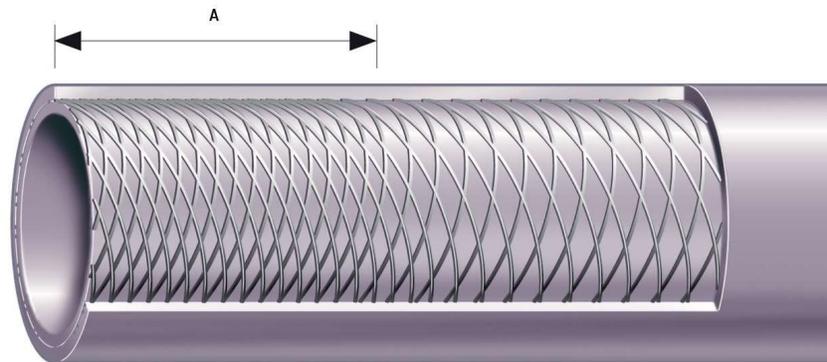

The catheter inserter on the pigtail catheter, can be used to straighten the catheter tip for easier insertion into the sheath. After catheter insertion, it can be peeled off the catheter. Fixed, strain relief, prevents the catheter from kinking at its proximal end.<sup>1</sup>

### Product Characteristics

- Double-braiding with variable pitch offers proximal support and increased flexibility at the distal end of the catheter, to promote a smooth catheter engagement in all kinds of anatomies.<sup>1</sup>
- The wall structure permits flow rates up to 23 ml/sec (saline) and a maximum pressure limit of 1200 psi (8274 kPa)<sup>1</sup>
- The Tiger and BLK curves enable angiography of right and left coronary arteries using either radial or brachial approach - The single catheter concept decreases procedure and fluoroscopy time<sup>2</sup>

## Angiographic catheter

An angiographic or diagnostic catheter is intended for use in angiographic procedures.<sup>1</sup> It delivers radiopaque media and therapeutic agents to selected sites in the vascular system.<sup>1</sup> It is also used to lead a guidewire or a catheter into the target site.<sup>1</sup>

Radifocus® Optitorque®, a complete line of coronary diagnostic catheters with optimum torque control and precise placement for smooth angiographic procedures.

### Product Characteristics

- High-torque design, precised manipulation<sup>1</sup>
- The Tiger and BLK curves enable angiography of right and left coronary arteries using either radial or brachial approach - The single concept decreases procedure and fluoroscopy time<sup>2</sup>
