Prepared Microscope Slides:

LIEDER high quality microslides are made in our own laboratories under rigorous scientific control. Size 26 x 76 mm (1 x 3 inches), best glasses with fine ground edges. Top quality histologically fixed materials are used. The application of special staining techniques guarantees a clear, multicolored representation of all tissue structures. LIEDER slides meet all scientific requirements. All slides are furnished with printed labels.

- The materials were derived from the animals, plants or human tissues.
- The origin of the products are stated below
- The products are intended for laboratory, research or teaching purposes only.
- The products were manufactured, processed and handled in such a manner as to prevent the transmission of communicable disease pathogens.
- The goods are microscope slides and the source material is a mix of animal (both land and water), human, and plant origin. The slides have been preserved, stained and sealed with a cover slip using adhesive and standard histology methods
- The products were manufactured, processed and handled in such a manner as to prevent cross-contamination with BSE-related materials (e.g., SRMs or any materials contaminated with SRMs)
