Letter of Recommendation

By the present, the management of the GIZ Project "Inter-communal Water Management along the Dniester" hereby certifies close cooperation with the company GAMA-VILO SERVICE SRL within a GIZ – Regional Development Agency Contract Nr. 1/18/22 signed in October 2018 for the supply of 12 submersible pumps and 4 booster sets and connected automation systems and their installation in 7 localities of the Project area, including Dubasari city in Transnistria region.

During the contract implementation, the Company proved reliable executing and engineering capacity, bringing added-value to the contract by taking care to replace old auxiliary fittings.

The Company performed diligently and effectively under difficult weather conditions and enjoyed full support of the beneficiary Local Public Authorities and water operators.

In line with above, we strongly recommend GAMA-VILO SERVICE SRL for future subcontracting.

Respectfully,

Hanns-Bernd Kuchta,
Manager de proiect
